1994 Starts With Optimism
Buffalo Nickels Open With a "Bang"

The start of a New Year always seems to bring out the *optimism* in coin dealers. First, depending on the nature of their business (mail order vs. store-front, etc.), many have just 'survived' either a very *slow* or a very *busy* time. The Holiday season itself is usually a time for the 'recharging of batteries', and the perennially successful F.U.N. Show (taking place this week) finds dealers and customers relaxed and eager to do business.

While we know better than to make predictions about 1994, we can state with confidence one "change" in the marketplace that will be taking place (based on conversations with *many* dealers): Dealers will be paying even *closer* attention to their customers and the ***needs*** of their customers. This is hardly news, since it is the continuation of a trend that we have been seeing for several years. What is 'newsworthy' about it, however, is that it seems to be coupled with dealers starting to question the way the coin 'business' operates.

Numismatics has always been an ***inventory-based*** business. Dealers would issue a price list, and their customers would buy some of this and some of that; and yes, dealers would notice that some series seemed to be particularly active, and would buy more heavily there. But the focus remained on buying coins at an advantageous price that had some chance of selling with a good profit (based on a general knowledge of the customers' demand). The spread between purchase price and potential selling price was every bit as important as *what the customers actually wanted!*

When this type of selling began to produce lower sales, many dealers rediscovered the Want List as a potent tool for generating sales; in the process, they also discovered the value of specifying customer demand. In good times, the dealer could afford the larger inventory in the hopes of satisfying the uncertain demand that would appear; when inventory carrying-costs made that strategy less effective, targeting customer demand suddenly made sense. The most successful dealers, whether wholesale or retail, have come to realize that the coin business is becoming ***service-based!*** This is not "sport-barking" but a genuine change in perspective. Curiously enough, the first dealers to recognize this trend seemed to be the wholesalers; when turning coins at modest profit levels is one's livelihood, paying *close* attention to customer demand is critical.

With most dealers attending the F.U.N. Show, teletype activity has been modest this week. Silver Commemoratives were mostly steady, with small negative adjustments outdistancing the Bid increases. Gold Commems are starting the year with real signs of life. Morgan Dollars & Peace Dollars slipped slightly due to generics and discounted selling. Mint State Type Bids were largely steady, but some levels are adjusting downward to more accurately reflect demand. Mint State Gold Type provided a mixed bag. Proof Type and Proof Gold Type showed scattered declines. Buffalo Nickels continue to demonstrate real strength, while Mercury Dimes remained steady. Walkers were steady, with some slippage in the later date, better-grade issues. Proof Singles slipped slightly.

Dealers will want to note our 'centertold'; it provides a complete look at the ***CMI*** charts of the *CCDN Coin Market Index* for the last four years. We continue to receive much-appreciated feedback on their value as a sales-tool.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN auction on a sight basis.

WALKING LIBERTY HALVES

If your coin will stand on its own merits regardless of the certified grade, a higher *CDN* Bid may be more indicative of current market value.

Long Beach Bourse & Auctions On Horizon
Rothenberger Commem Set to Star

With a successful F.U.N. Show behind them, dealers are starting to look forward to the next major flurry of numismatic activity - the February Long Beach Show and associated auctions. For the benefit of readers new to numismatics (*everyone* else already knows about the thrice-annual Long Beach Shows), there are a handful of conventions that simply *require* attendance by dealers and serious collectors. Long Beach, F.U.N., the A.N.A. and a few others present unparalleled opportunities for *inspecting* coins, and ***buying*** coins. Get enough coins, dealers and collectors together in one place, and a coin market is bound to take place.

Superior Galleries pre-Long Beach auction (January 31-February 1) will be featuring one of the most beautiful complete sets of certified coins (PCGS & NGC) ever assembled - the 144-piece Harold Rothenberger Collection of United States Commemoratives. The beauty of this set will immediately call to mind the Larry Shepherd Collection - an appropriate comparison, indeed. Several Shepherd coins are included in the Rothenberger Collection, and Shepherd participated in the completion of the set. Beauty is in the eye of the beholder, and numismatists will be so impressed by the exceptional quality of these coins that they may forget to argue about which set was the most beautiful!

All 144 Rothenberger coins grade MS65 or higher; more than one-half have been certified as MS67 or MS68! All 50 Types are represented in MS66 or higher. More significantly, each of the coins was selected for their gorgeous toning and eye-appeal. Among the lovelier pieces: (see inset)

1937 Antietam	PCGS68
1936-S Bay Bridge	PCGS68
1892 Columbian	PCGS67
1936 Gettysburg	NGC68
1922 Grant with *	NGC67
1900 Lafayette	PCGS66
1925 Lexington	NGC67
1938 New Rochelle	PCGS68
1935 Texas	PCGS68

Quality of this caliber will obviously translate into very high prices; underbidders will have to console themselves with other selections from the 1000+ Commemoratives being offered in this catalog.

This week's charts reflect the overall stability of the market. Many coins are trading at current levels, so relatively few plus or minus signs are being produced; only a modest number of declines are resulting from discounted selling. This is a market that cannot be usefully judged by the number of price changes occurring from week to week.

Silver Commemoratives were steady with some Bid advances offsetting discounted trades. Gold Commems continue their surprising advance, with a few dozen plus signs centering on the MS63-65 grades. Morgan Dollars were steady with MS65 generics rising to the low $80s. Peace Dollars were also stable, with a minimum of changes. Mint State Type was steady, but most of the few changes reveal a little weakness. Mint State Gold Type showed plenty of activity, with minuses outgunning the advances two-to-one. Proof Type was steady, as was Proof Gold Type.

Among the specialty series, Buffalo Nickels turned in one of their quiet weeks following their recent run-up; this trend was apparent during all of 1993. Mercury Dimes were quiet, but nearly all of the few changes were discounted sells. Walkers were more active, but here too, many of the changes were downward. Proof Singles also ended the week on the downside, accounting for a major portion of the declines in this week's *Bluesheet*.

INVENTORY HIGHLIGHTS

1857 NGC MS66 Flying Eagle Cent NGC/PCGS Population 4/4
The epitome of this American classic with full detail of design and glorious, rainbow color around the peripheries **$5,495.00**

1938 PCGS PR67 (Red) Lincoln Cent NGC/PCGS Population: 0/3
One of the finest known and looks like it was minted last week. In our opinion, one of the best values in high quality numismatics **$1,775.00**

1856 PCGS MS65 (Ty II) Three Cent Silver NGC/PCGS Population: 5/4
One of the rarest U S Type pieces. This coin has a lot going for it - good color and lustre, great strike and attractive mintage and pop **$5,195.00**

1867 NGC MS66 Shield Nickel NGC/PCGS Population: 3/0
This particular coin is scarce enough by Type, let alone this particular date! A common date (1883 - Pop 20) would have cost you $6,000.00 a few years ago. An 1867, well, a whole lot more. Mostly white with traces of light, golden color **$1,750.00**

1827 NGC MS65 (Lg. Eagle) Bust Dime NGC/PCGS Population: 3/1
The beautiful capped bust design highlighted by light, golden color atop semi-prooflike surfaces. A classic numismatic rarity and a great investment **$7,495.00**

1862 PCGS MS66 (No Motto) Seated Quarter NGC/PCGS Population: 2/4
A beautifully toned example of this elusive 'no motto' issue. Light, pastel shades of lavender and blue are surrounded by an intense ring of golden-orange. This is one of only 29 examples available for the entire type (1840-65) **$7,250.00**

1897 PCGS PR67 Barber Half NGC/PCGS Population: 10/8
A spectacular assortment of lavender, blues, greens and oranges blend over flawless surfaces. The sensational appearance you'd expect from the grade .and at an almost unbelievable low price **$5,250.00**

1885 NGC PR66 Morgan Dollar NGC/PCGS Population: 4/15
A beautiful, cameo example bathed in an extremely light-golden hue. A near-perfect representation of this classic design and recommended by several authorities as a "Top Pick" for the coming year **$4,950.00**

Cleveland PCGS MS67 NGC/PCGS Population: 9/10
Pristine surfaces with a sensational mingling of bright greens, orange and reddish hues highlighting both obverse and reverse. One of the scarcest Silver Commems in this high condition and worthy of the finest collection **$4,850.00**

New Rochelle PCGS MS67 NGC/PCGS Population: 10/35
PCGS recently graded a group of this issue, however, we feel this example is quite superior to most of the bunch. Bright, brilliant centers with fiery orange and red color forming the peripheries **$3,095.00**

San Diego (1936-D) NGC MS67 NGC/PCGS Population: 4/9
One of the most difficult Commems to locate in this condition. This example is attractively toned in original, varying shades of golden color Try to find another **$3,450.00**

1907 PCGS PR65 $2.5 Liberty Gold NGC/PCGS Population: 12/18
Proof gold is certainly one of the most attractive areas in numismatics. There is something magical about gold which entrances people Mintage figures are extremely low (between 20 and 225 pieces each year). This fantastic example was resubmitted twice for a possible PR66 grade at PCGS and NGC. A must see at a great price **$12,250.00**

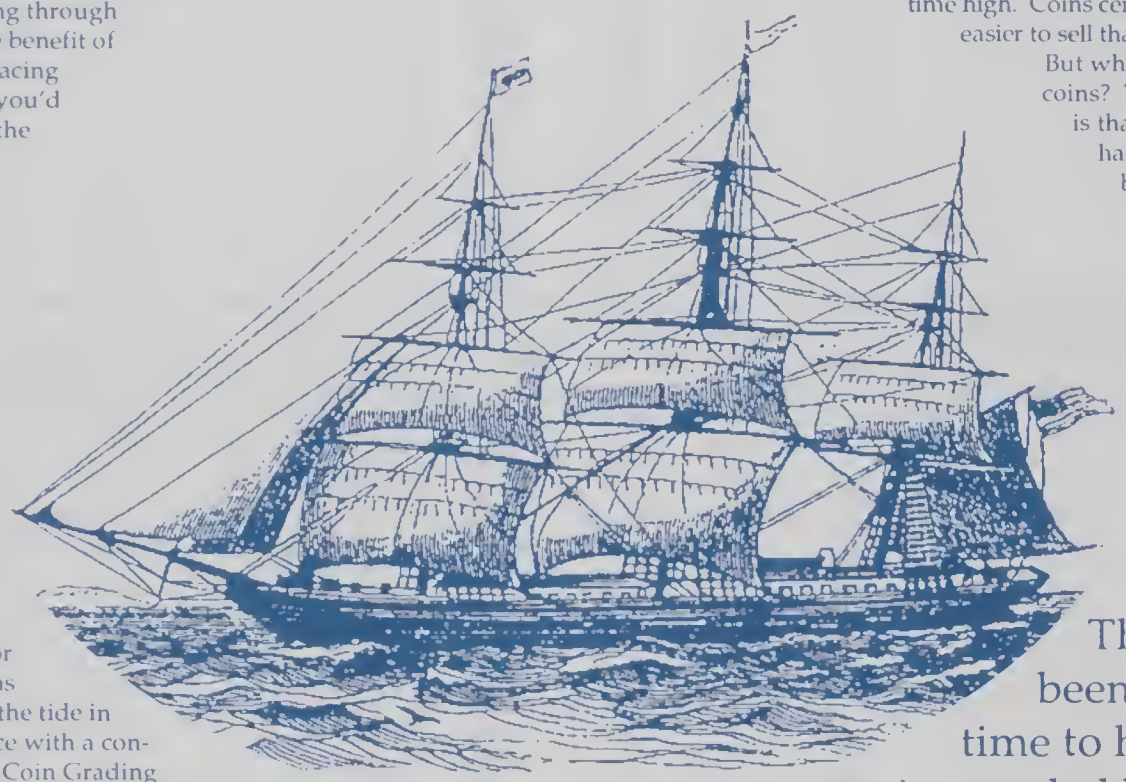
A Safe Harbor For Your Coins.

Treacherous waters.

Can you remember when everyone had a different opinion about whether a coin was an MS64 or an MS65? Or when prices on coins varied wildly even though the coins looked the same to you? And what about when the MS65 you bought became an MS64 when you went to sell it?

If you've been in love with numismatics for even slightly more than eight years, then you probably recall the days before the Rare Coin Revolution.

It was a time when successfully participating in the coin market was often a matter of pure luck -- tantamount to navigating through stormy seas without the benefit of sails or rudder -- and placing hope against hope that you'd be able to steer clear of the rocks ahead.



A safe harbor for your coins.

That was the rare coin industry before an accepted industry standard and objective grading practices became available to consumers.

The startling need for consumer protection was responsible for turning the tide in the rare coin marketplace with a concept called Professional Coin Grading Service.

Soon PCGS introduced standardized, third-party grading -- and encapsulation to guarantee a coin's grade. The Rare Coin Revolution had begun.

PCGS received widespread acceptance among coin dealers and collectors by creating a new level of consumer confidence not before known to the hobby.

Now it's been almost a decade since the beginning of the Rare Coin Revolution. Certified coins rule in coin shops and on bourse floors. And the overwhelming acceptance of PCGS is a powerful testament to all of the advantages of third-party grading.

Buying a PCGS-graded coin is like having the expertise and experience of three professional numismatic consultants with you every time you buy a coin. What's more, it's like keeping all three on your personal payroll long after the transaction's complete, because each coin graded by PCGS is covered by our cash-back Guarantee of Grade and Authenticity as long as it remains in its tamper-evident, protective NumisCap™ holder.

These are the primary reasons why the vast majority of today's collectors would rather give up the ship than voyage into the rare coin market without the safe harbor offered by PCGS.

Stay the course.

Today's rare coin market makes it essential to have your coins graded by PCGS. Current market conditions have sent consumer confidence in the PCGS product sailing to an all-time high. Coins certified by PCGS are easier to sell than ever before.

But what about uncertified coins? The fact of the matter is that uncertified coins are harder to sell than ever before. Ask just about anyone in the industry if they're worth the risk.

So if you're interested in adding to your portfolio, now is an excellent time to speak to any one of our 701 PCGS authorized dealers in the U.S. or overseas.

There's never been a better time to have your coins graded by PCGS.

PCGS has a service for any coin in your collection. At $25 per coin for our basic 15-Day service, PCGS is common sense insurance for your coins. Our $15 Economy service is an excellent option designed especially for all non-gold coins valued at $300 or less. PCGS also offers many other services for cost-conscious collectors.

And while our prices are better than ever, best of all, so are our guaranteed turn-around times!

But regardless of the PCGS service you choose, each coin is graded with the same professionalism and care you are accustomed to from Professional Coin Grading Service.

For a complete list of services and the PCGS authorized submission centers nearest you, please contact the PCGS customer service department at 1-800-447-8848.

Certified A-Plenty at Long Beach
Rally or Not, Coins are Trading

The coin market remains mixed, but momentum is showing some movement towards the plus side. Dealers (and their customers!) seem to be building on the good news from the F.U.N. Show; if the optimism can be maintained through Long Beach, we may yet enjoy a Spring rally. The continuing challenge (according to many dealers), is that while customers concede that coins represent *great* value at current prices, they just 'simply' don't trust the overall economy enough to make major purchases. With recent economic dislocations, highlighted by so many natural disasters around the country, people feel safer maintaining their cash reserves.

With *less* volatility, the coin market might be able to make a stronger case for purchasing *now*. Dealer uncertainty about the market's ability to sustain a rally is based on the experiences of the past several years; but if dealers can't believe in the short-term prospects, they will never be able to convince their customers. Where will the good news come from? The market has remained basically flat since 1991, and any time *real* demand surfaced for a particular series, there was *more than enough* supply available to hinder an advance. Since 1991, there have been "just a few too many" coins for the demand; consequently, Bids have been slowly slipping. A "mostly-steady" market tending to the downside is a "tough sell"; ***if*** demand had been just a bit stronger, ***if*** we had a steady market slowly ***climbing*** over the last three years, then collectors would feel much more secure in making major commitments. Collectors can now be driven to excitement by the superrare, those pieces that ***have to be*** purchased ***now***, because they might not be on the market for another decade; common Type coins, however, usually available at current levels, don't exert the same sense of urgency, even at these low levels.

One of the continuing bright spots in the market comes from the auction scene, and dealers and collectors alike will have a panoply of certified material from which to choose. Superior Galleries is highlighting the superlative 144 certified pieces of Rothenberger Commemoratives. Heritage Numismatic Auctions will be presenting an all-certified Bullet sale; plus, their official February Long Beach Sale starts out with 727 lots of certified U.S. gold - with more to follow!

Silver Commemoratives were mixed this week, but Bidding activity has been picking up substantially, especially for the 'better' grades; also, many of the declines were small increments. Gold Commems remain on the move, with plus signs covering the chart. Morgan Dollars showed a rise in Bidding activity, with more dealers willing to 'put up' Bids in order to 'win' needed merchandise. Peace Dollars were also more active this week, with several issues showing solid advances. Mint State Type activity was mixed, with few substantial changes. Mint State Gold Type showed widespread minor declines.

Proof Type was steady; declines continue to out-number advances. Proof Gold Type was largely steady, with a few discounted sells. Buffalo Nickels turned in another rousing performance with nearly one hundred issues advancing - many in the "collector" grades. Mercury Dimes were quiet, and Walking Liberty Halves were mixed on the minus side, but with many plus signs in the higher grades. Proof Singles continue to slip, even after last week's major adjustments.

Collectors and Dealers Can Now Get Every U.S. Coin They Submit Graded and Slabbed...*even if the coin has a problem!*

...It means freedom of choice and freedom from all the other grading services who refuse to grade and encapsulate problem coins that are genuine.

"Introducing The New Improved PCI Certified Coin Capsules®

GREEN LABEL FOR "NO PROBLEM" COINS

OUR STANDARD CERTIFIED CAPSULE

Destined to make every coin you own (even the problem ones) More Valuable Than Ever Before!

Today, it only costs

$7.50

To get every coin you own in one of these clear, attractive, museum-quality encasements (slab) that is ultrasonically sealed.

RED LABEL FOR "PROBLEM" COINS

PROBLEM COIN CERTIFIED CAPSULE

DATELINE: 1993 CHATTANOOGA, TN

Effective immediately: When you submit U.S. coins . . . every one of them will be graded and encapsulated. Never before has any grading service offered such extensive attention to your coins. **Coins without any problems** will continue to be graded and holdered with the premium "old-familiar" GREEN INSERT LABEL. **Coins with problems** will now be graded and holdered with the new certified RED INSERT LABEL. These will be graded with the problem described and printed below the grade. Collectors and dealers can now get their coins graded, certified and slabbed even if the coin has a problem.

You make the choice between other grading services and PCI. And when you do please consider the following reasons that make the difference:

(1). PCI only charges $7.50 per coin (plus postage. etc.) to grade, authenticate, encapsulate and to process your order regardless of its value. Compare this to $50 or $23 or even $12!

(2). More collectors, dealers, individuals and banks (over 5,000 total) have submitted coins to PCI than any other grading service. We challenge any grading service to match our record beginning the day we opened on June 1, 1989 until now!

(3). Our standard express "turn-around" time from the day we receive your coins to the day we ship them out is 6 working days. At all of the other services this will cost you a minimum of $23! Our price is $7.50.

(4). Anyone may submit coins to PCI at the same low rates. The 2 other major grading services have formed exclusive dealer networks . . thereby restricting who may get coins graded. Why do you think they charge so much? It's obviously money in the dealers pocket not yours! No longer do you have to go through an "in-crowd" to get consistently graded coins. It's your private business!

(5). Every genuine dated coin you now submit (except plugged, holed, altered or undistinguishable) will be encapsulated in either the GREEN LABEL or RED LABEL slab. Collectors know that coins in slabs are generally worth more and now you can get in on the profits PCI does reserve the right to refuse to encapsulate any coin for any reason it feels would be detrimental to the numismatic industry.

(6) Any purchaser or submitter of a PCI coin who believes their coin(s) is misgraded, improperly attributed, or has questionable authenticity may resubmit the slab for a re-evaluation and/or reslabbing. The resubmitted process of evaluation and/or reselling will be paid for by PCI (excluding return postage and insurance which you pay)

6 DAY EXPRESS SERVICE SLAB SUBMITTAL FORM

Slabs Yield Top Dollar When Sight-Seen Certified Auction Lots Inspected Too

We have mentioned, on many occasions, the continuing popularity of the auction segment of the rare coin market. The number of certified coins in auctions continues to grow, in large part a consequence of the growing numbers of slabs in the marketplace. However, there is one minor drawback: it is a problem obtaining a photograph for the catalogue that will do the coin justice. The plastic reduces the crisp focus that numismatists have come to expect in a quality catalogue, and light reflection off the plastic makes *any* decent photograph tricky. A Heritage Bullet catalogue, featuring *only* certified coins, solves that problem by having *no* photographs accompany their abbreviated descriptions; more traditional catalogues are coping with extra film.

Buying certified coins at auction has illuminated other interesting aspects of the coin market. It goes without saying that coin collectors like to *look at* coins, and they like to look at a *lot more* coins than they can afford to buy. During auction lot viewing, a collector gets to examine not only a wide range of material, but quite often, a number of specimens in which he is distinctly interested in buying. He is ***welcomed*** by the auction company to inspect their lots, in the hopes that he will join the ranks of their other successful, satisfied bidders. Contrast this attitude with the reaction you might get from the typical bourse dealer if you asked to carefully examine his entire inventory while you were *thinking* about making a purchase! Busy dealers don't always appreciate a 'service economy'. Any wonder auctions are continuing to grow in popularity?

The inspection of certified lots has much to say about this market. Except on the most generic of coins, collectors, investors and dealers alike want to *examine* their coins before purchasing. The **sight unseen** concept may work fine when purchasing large lots of generics: do you really need to examine 1,000 MS63 Morgans? But for more valuable material, it simply makes sense to insist upon personal examination. Largely, the original concept of an electronic, certified market that would be moving millions of dollars of slabs **sight-unseen** every day has been replaced by a more accurate vision of how buyers *want* to work in the coin market. All coins are not alike, and beauty remains firmly in the eyes of the beholder. The certified grade on a coin does not *replace* the judgment of the buyer, but serves as an impressive opinion that *frames* the personal decision-making process of the buyer. The certified lots sold at auction are examined by Bidders just as carefully as the 'raw' lots, and the satisfaction of personal examination encourages the comfort level that produces record prices when the gavel drops.

Sight-seen viewing of coins, at auction, on the bourse, or even through the electronic exchanges, means higher prices. The market has spoken quite clearly on this, and it is a judgment that the ***Bluesheet*** notices on a daily basis. The Bid levels for non-generic coins on the electronic exchanges have fallen far lower than the current value of the coins. Bidders don't particularly like 'forced' bidding, as they may be 'forced' to buy a coin they dislike, so their Bids remain at safe, *low* levels. Few coins are being sold to those low sight-unseen Bids, so only sporadic trades are driving our Bids lower, coins trade much more actively **sight-seen**, and at higher levels, in the larger marketplace.

ASK LISTINGS

ASK columns reflect the asked dealer to dealer selling prices based on information of the Advance Coin Trader from wholesale trading networks and from other sources of wholesale transactions. Asks shown are realistic prices which dealers would ask to offset losses on consigned coins to sell. The Advance Coin Trader has determined that dealers generally have a reasonable likelihood of following all wholesale postings or quotations. Each wholesale transaction then is an implied inventory or holding of the dealer and a likely representative of the current market value of any coin. Many dealers do not post active bid and ask prices. Of that is an authority, a condition or the like the ASK information. Due to the volatile nature of the market, current asking may be greater or less than the price listed. A higher grade coin might display a lower ASK than a lower grade coin due to limited availability. **Listing Policy** During the thirty days prior to publication we track the lowest Ask in the marketplace. Each Trade Advance subscriber receives a computerized Low Asks report listing the lowest asking price for each coin we track in the publication. We have suggested Ask prices only for those coins that [illegible] are not the following listing symbols: "w" – Low Ask report during the week prior to publication (week end); "m" – Low Ask during the previous four weeks (month); "t" – Low Ask during the past three months; "lm" – Low Ask reported last month; "lt" Track reporting last month; "ot" [illegible] "a" for auction transactions; "oa" – Auction older than 1 month

If you have coins to sell, please contact us.

Silvano DiGenova and Stuart Levine of Tangible Investments of America, Inc. and Steven Contursi of S.L. Contursi, Inc. will be merging their respective rare coin enterprises. This remarkable combination of talent will combine to form a major rare coin organization of unprecedented experience, knowledge, talent and integrity.

AMONG THEIR COMBINED ACHIEVEMENTS ARE:

- ✶ Founding member of PCGS, today the largest third party grading service. Also instrumental in assembling the PCGS grading set.
- ✶ Orchestrated the sale of the famous Wayne Miller Silver Dollar collection, which realized over $1 million in 1986.
- ✶ Purchased and sold the Clifford-Kagin Territorial gold collection valued at over $2.9 million in 1988.
- ✶ Major buyers in the famous Garrett, Bareford, Eliasberg, Brand and Carter sales.
- ✶ As Senior Vice President, Steve Contursi guided the growth of Blanchard and Company, Inc. from a $1/2 million in U.S. numismatic sales to over $4 million in sales per month.
- ✶ Key buyer in the Norweb collection auctions, purchasing in excess of 10% of the entire collection.
- ✶ Number one purchasers in the:
  James A. Stack sale
  Trompeter Gold sale
  Floyd Starr sale
  Stack's 55th Anniversary sale
  these and many, many more sales.
- ✶ Purchased the last part of the fabled Lavrene Redfield hoard.

Together these unique partners have purchased in excess of $1/2 billion in U.S. rare coins. Now they combine their numismatic expertise, overall integrity and financial stability. Our multi-million dollar inventory will speak for itself. This partnership combines over fifty years of numismatic experience. Call today and see what a difference it is to deal with a real Rare Coin firm.

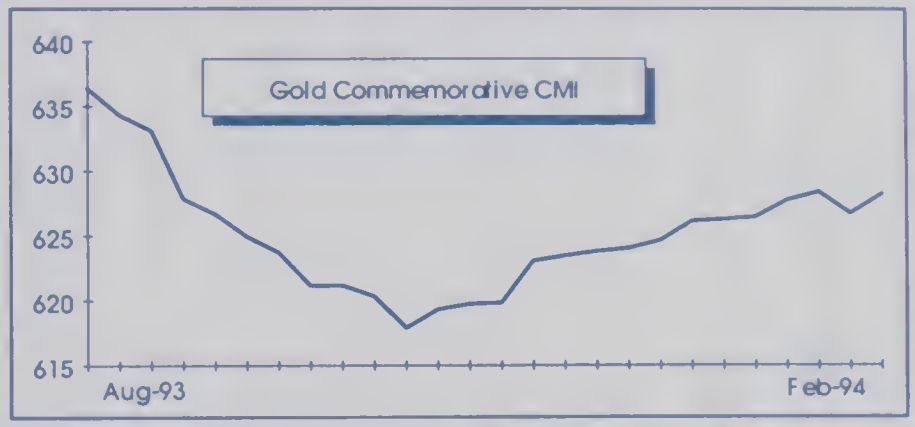
Slow Market Meets Long Beach Heat
Buyers & Sellers Both Prepared

Despite high expectations for the Long Beach Show, the market continues to drift ever so slowly downward. Most charts were just on the minus side of steady, continuing the trend that characterized much of 1993 (and a goodly part of 1992 as well!). This week, plus signs outnumbered declines only in the Gold Commemoratives and Mercury Dime charts.

Dealers seem to be evenly split in their expectation for the Long Beach Show, with their perspective heavily dependent on their inventory position. Both buyers and sellers expect to have a good show, as long as they are willing to trade *at current levels*.



Silver Commemoratives were mostly steady, with scattered minus signs on a few discounted sells in MS64-MS66. Gold Commems, which *seemed* to lack any support whatsoever during the last several years, have been showing quite a bit of life lately, especially below MS65. The central chart shows the ***CMI*** for Gold Commems for the past six months. Their ***CMI*** had been on a downward trend since January (when it stood at the 680-700 level); by August 6, 1993 it reached 636.37 on the way down to the bottom of 617.91 on October 15, 1993. Since then, it has been almost entirely good news for these sparkling beauties. Currently at the 628.20 level, it remains to be seen whether current levels of demand will continue to push Gold Commem Bids higher. They may have a long way to go for a complete recovery, but at least they are headed in the right direction!

Morgan Dollars were mixed in light trading, especially in the MS65 column; much of the interest this week (while dealers were traveling to Los Angeles) seemed to be concerned with generics. Peace Dollars also saw few changes. Mint State Type remained steady, but discounted sells continue to 'nip away' at selected bid levels: nothing terribly wrong here, but nothing *right enough* to indicate an imminent rally either. Mint State Gold Type, which has been see-sawing its way through the charts, had another down week, with declines below MS65 outnumbering advances by a factor of ten.

Proof Type managed to turn in an even performance on the changes, with the bulk of the chart remaining steady; this is another chart that dealers are expectantly watching for any sign of real strength. Proof Gold Type remains steady on few trades. Among the specialty series, Buffalo Nickels took this week off, following their pattern of late. Mercury Dimes, in a surprise showing, reflected some major advances in MS65FB and MS66FB. Walking Liberty Halves came in on the down side of steady. Proof Singles continue to drop on lowered levels of demand.

CERTIFIED COIN DEALER newsletter

a weekly report on the certified market
published by the Coin Dealer Newsletter (est. 1963)

Vol. IX No. 6 | February 11, 1994 | Single copy price $4.00

Selected Bids Continue to Rise
Certified Market Still Has Opportunities

Most coin dealers given the opportunity, will express some level of dissatisfaction with current wholesale prices and levels of activity. Fair enough. But it is also true that there are still opportunities in this market to make a useful profit while finding new wholesale homes for coins. Just in the last week, we have seen ***many*** arbitrage opportunities.

Let's take a look at what was available in Silver Dollars. A 1935 $1 in MS64 has been available in the marketplace (*for several weeks!*) at $120, while a Bidder on the same system has been advertising to buy one at $145! Neither party has located the other; after this much time, it appears they have no intention of locating each other. Nor has any other dealer stepped in to arbitrage; too busy is our guess. Incidentally, these Bids are from one of America's leading dealers, whose *sight-unseen* Bids are placed before the marketplace ***every week***; these are not 'fly-by-night' or 'one-shot-only' Bids. There is no excuse that the Bids might not be 'legitimate'.

If this only happened once in a while, it wouldn't matter to the market. Unfortunately, this is not an isolated incident; there are many, many more in all of the charts. ***Also seen in the Silver Dollars last week***: An 1878 7TF (Rev. 79) in MS64 traded at $214 despite an active Bid (also around for several weeks) of $255; an 1879-O $1 in MS63 traded at $126, ignoring an outstanding Bid of $160. An 1887-S $1 MS63 continues to be offered at $135, while a Bidder continues to offer $140. A 1902 $1 in MS64 traded at $65, ignoring an active Bid of $82. A lot of money is being left on the table.

Part of the explanation lies with the fragmented nature of the coin business. There are simply so many sources of *partial* information that most dealers are just ***too busy*** to be able to search for every bid. Maybe there is even a little bit of laziness involved: for an extra $5, maybe it makes sense to take the easy & available Bid instead of doing the extra 'homework'. *Quick and easy* makes sense at $5, but an extra $40 on a $200 coin is almost 'real' money. These situations may not be 'common', but they take place far too often in this time of thin profits. One thing is sure: If dealers can buy *below* the highest wholesale Bid, it's no wonder that customers get the idea that they can buy *at* wholesale.

Silver Commemoratives continue steady, but they also show scattered discounted sells – just enough to be annoying. Gold Commems continue to show demand in the MS63 & MS64 columns. Morgan Dollars turned in a balanced performance, with MS65 generics under demand. Peace Dollars were mixed as well, with scattered changes. Mint State Type was steady, with only minor changes across the chart: no great strengths, no great weaknesses. Mint State Gold Type, on the other hand, couldn't sustain a rally if a dealer's livelihood depended on it. Proof Type was on the minus side of steady, with a few declines to be found in every column; like the Mint State Type Coins, the problem continues to be a lack of strength rather than any real weaknesses. Proof Gold Type remained steady. Among the specialty series, Buffalo Nickels are back 'on track' with their "mini cycles" – on a week, off a week, and that's just fine, as long as they keep climbing! Mercury Dimes were largely steady this week, with a few scattered declines in the later-dates. Walking Liberty Halves were also quiet, and also had scattered minuses. Proof Singles continue to exhibit a notable (or should that be 'nibbling') lack of support.

MAKING MONEY FOR OUR CONSIGNORS AT AUCTION

LOT 1358 **1919. PCGS graded Mint State 68. Full Head, realized $38,500.00 at Superior's January Coin Auction.**

Dear Numismatist:

One of our clients consigned a Standing Liberty Quarter Set to our Pre-Long Beach auction in January, 1994. They were all graded by PCGS several years ago, but after careful study, our in-house experts felt that some of the coins had been undergraded.

We resubmitted the coins and as we had predicted, they were given higher grades. Our client realized extraordinary prices at auction. One in particular warrants special mention: Lot 1358 was a 1919 Standing Liberty Quarter PCGS graded Mint State 68 full head. We thought this coin was the finest ever graded! After much spirited bidding, this coin set a record price for a common date. It was bought by Jay Perino of The Mint for $38,500.00.

Over the years, Superior has made millions of dollars for our clients, by knowing which coins to resubmit for new grades. Why not take advantage of Superior's expertise and experience? Consign your collection to our auction house. We are currently accepting consignments for our May 29-31, 1994 Pre-Long Beach auction and our July 23-25, 1994 auction held prior to the ANA Convention in Detroit.

We're looking forward to hearing from you.

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be encountered on any strike, with less reflectivity than the deep-mirror Prooflikes. Bids for P.L. are usually much lower than for DMPL's, but command some premium over non-P.L. strikes.

A Safe Harbor For Your Coins.

Treacherous waters.

Can you remember when everyone had a different opinion about whether a coin was an MS64 or an MS65? Or when prices on coins varied wildly even though the coins looked the same to you? And what about when the MS65 you bought became an MS64 when you went to sell it?

If you've been in love with numismatics for even slightly more than eight years, then you probably recall the days before the Rare Coin Revolution.

It was a time when successfully participating in the coin market was often a matter of pure luck -- tantamount to navigating through stormy seas without the benefit of sails or rudder -- and placing hope against hope that you'd be able to steer clear of the rocks ahead.

A safe harbor for your coins.

That was the rare coin industry before an accepted industry standard and objective grading practices became available to consumers.

The startling need for consumer protection was responsible for turning the tide in the rare coin marketplace with a concept called Professional Coin Grading Service.

Soon PCGS introduced standardized, third-party grading -- and encapsulation to guarantee a coin's grade. The Rare Coin Revolution had begun.

PCGS received widespread acceptance among coin dealers and collectors by creating a new level of consumer confidence not before known to the hobby.

Now it's been almost a decade since the beginning of the Rare Coin Revolution. Certified coins rule in coin shops and on bourse floors. And the overwhelming acceptance of PCGS is a powerful testament to all of the advantages of third-party grading.

Buying a PCGS-graded coin is like having the expertise and experience of three professional numismatic consultants with you every time you buy a coin. What's more, it's like keeping all three on your personal payroll long after the transaction's complete, because each coin graded by PCGS is covered by our cash-back Guarantee of Grade and Authenticity as long as it remains in its tamper-evident, protective NumisCap™ holder.

These are the primary reasons why the vast majority of today's collectors would rather give up the ship than voyage into the rare coin market without the safe harbor offered by PCGS.

Stay the course.

Today's rare coin market makes it essential to have your coins graded by PCGS. Current market conditions have sent consumer confidence in the PCGS product sailing to an all-time high. Coins certified by PCGS are easier to sell than ever before.

But what about uncertified coins? The fact of the matter is that uncertified coins are harder to sell than ever before. Ask just about anyone in the industry if they're worth the risk.

So if you're interested in adding to your portfolio, now is an excellent time to speak to any one of our 701 PCGS authorized dealers in the U.S. or overseas.

There's never been a better time to have your coins graded by PCGS.

PCGS has a service for any coin in your collection. At $25 per coin for our basic 15-Day service, PCGS is common sense insurance for your coins. Our $15 Economy service is an excellent option designed especially for all non-gold coins valued at $300 or less. PCGS also offers many other services for cost-conscious collectors.

And while our prices are better than ever, best of all, so are our guaranteed turn-around times!

But regardless of the PCGS service you choose, each coin is graded with the same professionalism and care you are accustomed to from Professional Coin Grading Service.

For a complete list of services and the PCGS authorized submission centers nearest you, please contact the PCGS customer service department at 1-800-447-8848.

There's never been a better time to have your coins graded by PCGS!

Activity Continues to Climb
Buyers & Sellers Still Searching

Bidding activity in the marketplace continues to spread, with plus signs starting to appear on additional charts. At this point, the extra Bids are *strengthening* the market rather than *advancing* it, but that is welcome news to many dealers. In addition to growing numbers of Bids and Buy messages, we also call attention to increases in sell messages. This was expected, but surprisingly, many of the sell levels were modestly lower this week. Sellers attempted to narrow the gap to encourage a transaction! There is more than one way to fuel a rally!

Last week's comments about arbitrage opportunities struck a responsive chord, although several dealers doubted whether it was possible for such profitable opportunities to continue. Granted these are not always available, at least not with a large enough profit potential to sustain interest. But in this market, selling any coin wholesale for less than 'top dollar' strikes us as careless. In the defense of dealers, we would be the first to point out that dealers have a bewildering array of sources of information. Dealers wishing to post Bids or Asks have quite a choice of print publications, faxes, photocopies, electronic messaging systems, and even computerized exchanges. We know that it can be more than a full-time job just keeping up with this information, **because we have a full staff devoted to just that!** Few dealers have that much time, and that spells "OPPORTUNITY" for others.

What kinds of opportunities were available to the arbitrageur this week? Following-up on last week's look at the Dollars, we noticed the following: an 1884-CC in PCGS62 was offered at $45 against an active quantity Bid of $50; the same coin in PCGS63 was offered at $47 against an active quantity Bid of $52; a 1921 Peace $1 in PCGS64 was offered at $276, and a second at $270, against an outstanding Bid of $300; a 1924 in NGC65 was offered at $175 against an active Bid of $236; a 1927 in PCGS63 was offered at $70 against an active Bid of $80; a 1927 D in PCGS64 was offered at $360 against a Bid of $410; a 1934 in PCGS63 was offered at $80 with an active Bid outstanding at $88. Bringing buyers and sellers together is not an unpleasant way to profit from market inefficiencies.

Silver Commemoratives continue slightly on the minus side of steady, while Gold Commems continued their positive move with a nice sprinkling of plus signs. Morgan Dollars weighed in with a modest decline, with minus signs slightly outnumbering the advances, while Peace Dollars dropped sharply. Mint State Type coins continue to reflect the lethargy of the overall market, with minor discounted sells nibbling away at both Bid and confidence levels; this is an important series to the community, and activity here is carefully followed. Mint State Gold Type turned in a mixed performance, but at least ended on the up-side. Proof Type remained steady, with only a sprinkling of changes across the chart. Proof Gold Type was its usual steady self, with declines outnumbering advances just two-to-one. Off-again, on-again Buffalo Nickels were *on-again* this week, with another *surge* in Bid levels; plus signs covered nearly 10% of all Bids. Mercury Dimes were steady, with only a few discounted sells to disturb their equilibrium. Walking Liberty Halves were mixed. Proof Singles came in on the positive side of the tally sheet this week, hopefully their slide will reverse now.

MORGAN DOLLARS

PCGS DMPL and NGC DPL indicate the Deep Mirror Prooflike coins. Both are MS-65 quality. A coin's mirror prooflike or non-prooflike FEATURE will be listed generally as a supplemental issue. DMPL designation does have a very substantial fully Deep mirror prooflike requirement.

Collectors and Dealers Can Now Get Every U.S. Coin They Submit Graded and Slabbed...*even if the coin has a problem!*

. . . It means freedom of choice and freedom from all the other grading services who refuse to grade and encapsulate problem coins that are genuine.

"Introducing The New Improved PCI Certified Coin Capsules®

GREEN LABEL FOR "NO PROBLEM" COINS

OUR STANDARD CERTIFIED CAPSULE

Destined to make every coin you own (even the problem ones) More Valuable Than Ever Before!

Today, it only costs

$7.50

To get every coin you own in one of these clear, attractive, museum-quality encasements (slab) that is ultrasonically sealed.

RED LABEL FOR "PROBLEM" COINS

PROBLEM COIN CERTIFIED CAPSULE

DATELINE: 1993 CHATTANOOGA, TN

Effective immediately: When you submit U.S. coins. . . every one of them will be graded and encapsulated. Never before has any grading service offered such extensive attention to your coins. **Coins without any problems** will continue to be graded and holdered with the premium "old-familiar" GREEN INSERT LABEL. **Coins with problems** will now be graded and holdered with the new certified RED INSERT LABEL. These will be graded with the problem described and printed below the grade. Collectors and dealers can now get their coins graded, certified and slabbed even if the coin has a problem.

You make the choice between other grading services and PCI. And when you do please consider the following reasons that make the difference:

(1). PCI only charges $7.50 per coin (plus postage. etc.) to grade, authenticate, encapsulate and to process your order regardless of its value. Compare this to $50 or $23 or even $12!

(2). More collectors, dealers, individuals and banks (over 5,000 total) have submitted coins to PCI than any other grading service. We challenge any grading service to match our record beginning the day we opened on June 1, 1989 until now!

(3). Our standard express "turn-around" time from the day we receive your coins to the day we ship them out is 6 working days. At all of the other services this will cost you a minimum of $23! Our price is $7.50.

(4). Anyone may submit coins to PCI at the same low rates. The 2 other major grading services have formed exclusive dealer networks. . . thereby restricting who may get coins graded. Why do you think they charge so much? It's obviously money in the dealers pocket not yours! No longer do you have to go through an "in-crowd" to get consistently graded coins. It's your private business!

(5). Every genuine dated coin you now submit (except plugged, holed, altered or undistinguishable) will be encapsulated in either the GREEN LABEL or RED LABEL slab. Collectors know that coins in slabs are generally worth more and now you can get in on the profits. PCI does reserve the right to refuse to encapsulate any coin for any reason it feels would be detrimental to the numismatic industry.

(6). Any purchaser or submitter of a PCI coin who believes their coin(s) is misgraded, improperly attributed, or has questionable authenticity may resubmit the slab for a re-evaluation and/or reslabbing. The resubmitted process of evaluation and/or reselling will be paid for by PCI (excluding return postage and insurance which you pay).

6 DAY EXPRESS SERVICE SLAB SUBMITTAL FORM

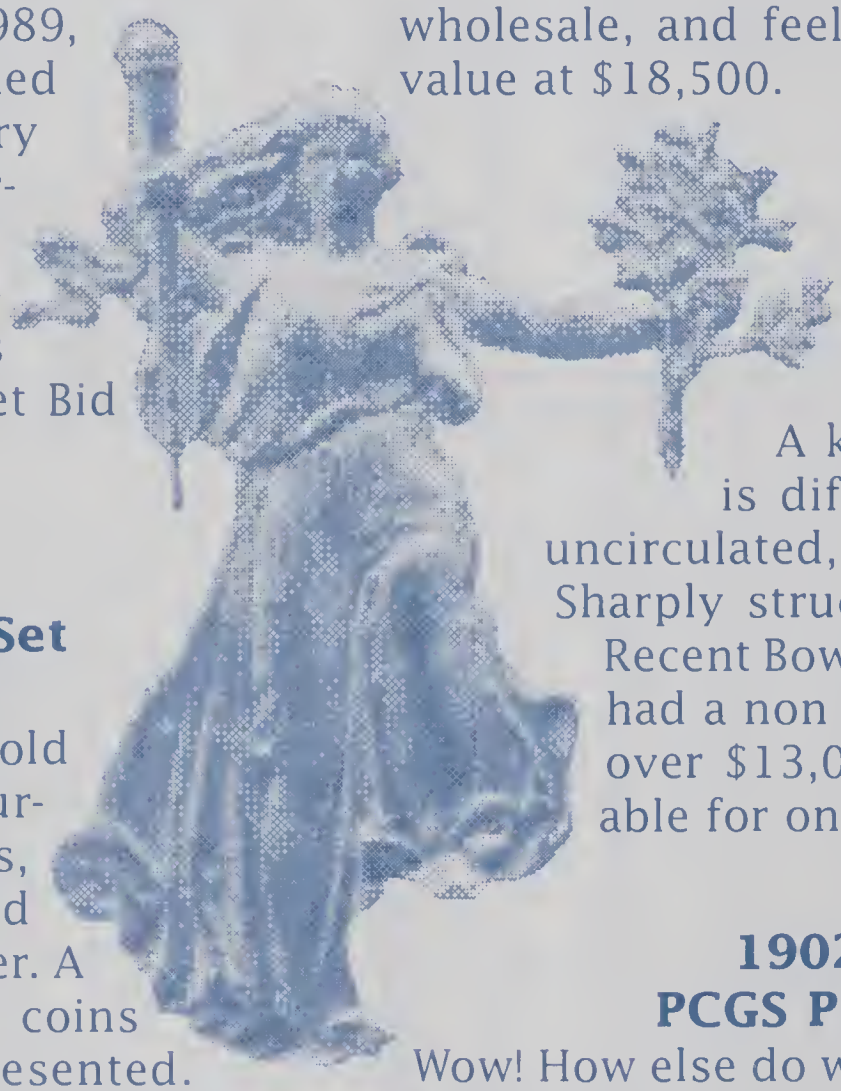
1840 Half Dime - Without Drapery
PCGS MS67!

A stunning example of Christian Gobrecht's Seated Liberty design. 100% fully struck on blinding white surfaces. This is the first MS67 PCGS has ever certified. Thinking back to 1989, this jewel would have fetched nearly $100,000! No Drapery coinage is especially desirable for its rarity and two year design. Priced attractively at $16,500 — which is only 10% over the Bluesheet Bid price.

Complete Gold Type Set
PCGS or NGC MS64

A hand selected 12 piece gold type set, all in MS64. We currently have 2 complete sets, both hand selected and matched for strike and luster. A great way to invest in gold coins with each type being represented. The key type two gold dollars are fully struck and very lustrous. 1988 high was over $100,000. Once these are gone, that's it. Call quick to reserve a set – PCGS or NGC graded at $42,500.



1801 $10
PCGS MS63

A gorgeous example of a true piece of Americana. Absolutely no detracting marks or copper spots on this large gem. We recently sold an MS62 for 13,500 wholesale, and feel this is an excellent value at $18,500.

1889 CC Morgan Dollar
PCGS MS63 Prooflike

A key date Morgan that is difficult to come by in uncirculated, let alone in MS63 PL! Sharply struck with light patina. Recent Bowers & Merena auction had a non prooflike MS63 fetch over $13,000. This piece available for only $13,500.

1902 $10
PCGS PROOF-65

Finest Known

Wow! How else do we describe this fabulous piece. Mile deep mirrors show off a flawless Ms. Liberty. The strike is incredible, actually looking like it was struck in 1994. We sold one in 1989 for $125,000. A great buy today for only $33,000.

Market Activity Still Increasing Bid Levels Slipping Slightly

The "certified coin market" is a difficult phrase to define. During the late Eighties, even while the number of slabs was growing rapidly, certified coins made up only a small (albeit important!) segment of the overall coin market. Today, market acceptance of the 'third-party opinion' is best demonstrated by the enormous number of coins which have already been encapsulated, with more joining their ranks every month. It really isn't useful to think of the certified market as being a separate market, while there remain lots of coins that have not been (and may never be) certified, it is more practical to consider the higher grades to be a *single* market. At the same time, nearly every chart in the ***Bluesheet*** seems to be acting independently. It's nice to have 'a mind of one's own', but in this case it almost seems like there are more than a dozen coin markets. And that's just on the higher grade material; the difficulty of describing the market becomes even more difficult when you take circulated collector coins into consideration.

The current coin market, at least in the higher grade material, could best be described as hovering just *slightly* on the minus side of *steady*. Dealers, especially those who have made customer service an important part of their business, report that activity is picking up "somewhat". Like most aspects of this market, optimism always seems to be guarded. Buying activity is picking up "a little", but not enough to lay the foundation of a new boom cycle. Bidding activity is picking up "a little", but not enough to inspire a new boom cycle. Bid levels are increasing on selected coins, but discounted sells and adjustments are lowering Bid levels on others. With the exception of Buffalo Nickels & Gold Commems, there is no chart in the weekly ***Bluesheet*** that is showing sufficient demand to characterize a growth cycle and even the Butts seem to be taking every other week off!

So there it is. The overall market isn't overly active, nor is it inactive. Some charts are active, some aren't. Some Bids are rising, perhaps just a handful more are falling. Overall, the market is steady with just enough of a negative twist to be noticeable in the long term. Indeed, that is the problem. This "ever so slightly decreasing stable market" has been behaving this way for far too long, but as long as the market shows no signs of reversing, a lot of money continues to sit on the sidelines. In the meantime, there are a lot of really nice coins available for fractions of their highs from just five years ago. Dealers aren't crazy about this market, but the contrarians are enjoying the opportunities to buy such nice coins at such reasonable levels.

This week there were few changes in the Silver Commemoratives, but most of those were small negative adjustments. Gold Commems were a little more active, with nearly all the movement upward. Morgan & Peace Dollars were basically steady, with lots of small adjustments and only a few major discounted sells. Mint State Type coins were steady, with most of the activity resulting in minus signs. Mint State Gold Type was more active, but here too, many of the changes were marked by slight declines. Proof Gold Type was steady. Buffalo Nickels boomed again this week, with plus signs on 10% of the issues. Mercury Dimes were quiet, as were Walking Liberty Halves, they shared little more than a dozen changes between them! Proof Singles ended slightly down, even though some specific Washington issues are in demand at higher levels.

Silvano DiGenova and Stuart Levine of Tangible Investments of America Inc and Steven Contursi of S L Contursi, Inc will be merging their respective rare coin enterprises This remarkable combination of talent will combine to form a major rare coin organization of unprecedented experience, knowledge, talent and integrity.

AMONG THEIR COMBINED ACHIEVEMENTS ARE:

- ★ Founding member of PCGS, today the largest third party grading service. Also instrumental in assembling the PCGS grading set.
- ★ Orchestrated the sale of the famous Wayne Miller Silver Dollar collection, which realized over $1 million in 1986.
- ★ Purchased and sold the Clifford-Kagin Territorial gold collection valued at over $2.9 million in 1988.
- ★ Major buyers in the famous Garrett, Bareford, Eliasberg, Brand and Carter sales.
- ★ As Senior Vice President, Steve Contursi guided the growth of Blanchard and Company, Inc. from a $1/2 million in U.S. numismatic sales to over $4 million in sales per month.
- ★ Key buyer in the Norweb collection auctions, purchasing in excess of 10% of the entire collection.
- ★ Number one purchasers in the:
  - James A. Stack sale
  - Trompeter Gold sale
  - Floyd Starr sale
  - Stack's 55th Anniversary sale
  - these and many, many more sales.
- ★ Purchased the last part of the fabled Lavrene Redfield hoard.

Together these unique partners have purchased in excess of $1/2 billion in U.S. rare coins. Now they combine their numismatic expertise, overall integrity and financial stability. Our multi-million dollar inventory will speak for itself. This partnership combines over fifty years of numismatic experience. Certified Coin Market Seeks Steady Demand Mint State Gold Type Reflects Market Malaise

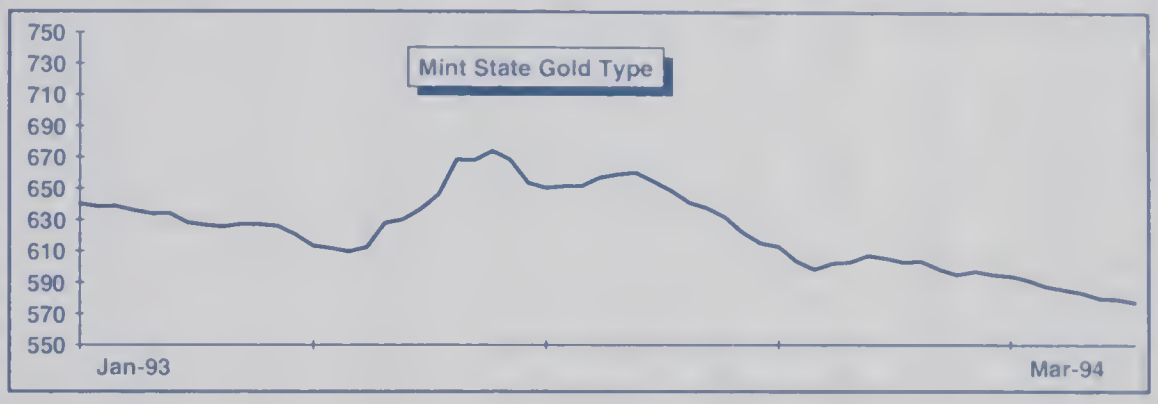
Contrarian investors are a breed apart, even on Wall Street. The theory behind *contrarian* investing is simple enough: The time to buy cheap is when everyone else is selling — when the item is *"out-of-favor"*. In a cyclical market, a *contrarian* with a good sense of timing buys at the bottom, when no one else is interested. The *contrarian* also knows that the time to sell is when everyone else is buying, when the formerly "out-of-demand" item becomes "amazingly in-demand".



In cyclical markets, like the coin market, this is the way that some dealers earn enormous profits. Many of our editorials deal with the concept of trading, and how important it is to the market that buyer and seller share a concept of value (so that a transaction can occur). Likewise, dealers need to move coins out of inventory and into their wholesale accounts. Well, none of this for the *contrarian*, who buys (albeit at the low price) those coins that he thinks are "worth" a great deal more (or will be over time). The *contrarian* then sits on his inventory for as long as it takes for prices to rise to his levels of expectation.

Buying items that no one else seems to want can produce a certain amount of stress, so this technique is not recommended for those faint of heart. It takes guts to go against the crowd. But these dealers seem to hide the stress well behind their tanned faces and relaxed expressions. We know of several dealers who have pursued this approach to the coin market over many years, and it works for them.

Perhaps the time has come to extend the concept a bit, and sell your clients on the strategy of *"contrarian collecting"*. For a collector who hasn't already chosen a specialty, this might mean selecting one of the less popular series. Despite the *contrarian* risk that the series might *remain* unpopular, the collector still enjoys lower prices going in as well as the excitement of building a collection. For the type collector, it might mean concentrating on those series that have seen the greatest decline since 1988/89. The belief that prices will rise again is supported when the selection is a known favorite; we call your attention to the graph for the ***Mint State Gold Type CMI***, and wonder why more *"contrarian-collectors"* aren't jumping all over these beauties.

Vol. IX No. 10 March 11, 1994 Single copy price $4.00

Stability Provides Foundation for Growth
Balance of Supply and Demand Convincing

Dealers, being the naturally optimistic people they are, have learned over the years to pay attention to the plus signs in our publications. In a rising market, plus signs meant that a higher selling price might become necessary as replacement costs rose. In a declining market, plus signs might still indicate areas of activity, just as minus signs pointed out areas of inventory concern. A natural consequence of working in a 'free market' is that attention must be paid to the price changes. Our editorials often dwell on them, as well as the volatility of the certified market. These topics dominate dealer conversations. The rapid movements possible by many of the most important market segments confirm the need for our weekly updates.

Preoccupation with the changes, however logical, has the unintended effect of overshadowing the overall *stability* of the market. In a typical week, we see price changes in less than 5% of the coins on our charts. Sometimes the changes are substantial, involving thousands of dollars; sometimes they may reflect a mere dollar increment on a generic coin. While we periodically remind readers not to depend *too* heavily on the simplistic counting of plus and minus signs, they are often used to convey an overall impression of market direction. This is fair enough (see our article in the September 1992 issue of the ***CDN Monthly Supplement*** for more on this topic!). Here too, the focus is on the small number of changes instead of the overwhelming stability.

Perhaps the most interesting questions for dealers to answer are how these perceptions affect their customers' decisions to buy. We all know what a booming gold bullion market can do for rare coin prices, but we haven't seen many of them lately. Do customers prefer the quiet reassurance of a steady market? Or do they prefer to wait until a rally moves into high gear before they hop on for some excitement and quick profits? Are there many contrarians out there who have the discipline to buy those items that are "out of favor"? After the disconcerting drops of the late Eighties, the market has been relatively stable (since late 1990's low point of 720.82, our *CMI* has only modestly declined to its current 699.11 level). For three years, the certified market has shown overall signs of stability, and it has failed to impress many of the previous "big buyers." Collectors continue to pursue their treasures, and they seem perfectly content with the stability.

As one dealer put it, "Absolute stability is probably impossible in any free market, but as long as the supply of rare coins and demand for rare coins are roughly in balance, we'll survive. Of course, we naturally would prefer that demand exceeded supply, as long as we had enough of that supply to make some profit!" We talk to a good number of dealers, and many of them confirm that they have reduced inventory over the last three years. That means that the collectors have done a fabulous job of keeping the floating supply relatively stable through their purchases. In 1994, it would be nice if the trade could turn that long-term trend of slight declines into a long term trend of steady advancement. The key remains getting more collectors and investors actively interested in rare coins, and that means using every resource at our disposal. Coins are neat pieces of history with exciting stories to tell; we need to make sure more people listen

PROOFLIKE MORGAN DOLLARS

PL Dollars may be more reflective and contrast sharply with their cameo surfaces, while DMPL coins may display more frosty Prooflike fields. Bids for PL coins usually much lower than for DMPL's but commonly command premiums over non-PL strikes.

The Grade and Authenticity of Your Coins Weren't Always Guaranteed.

Those Were the Days Before the Rare Coin Revolution.

Before the Rare Coin Revolution:

A typical investment-quality raw Morgan dollar as it might be presented prior to 1986. Without objective grading methods and guarantees, the grade of this coin was strictly in the eye of the beholder.

If you collected rare coins prior to 1986, then you probably know the following scenario pretty well.

Sure, coin dealers used the Sheldon numerical scale...to grade their own coins.

And what of objectivity and standardized grading? There were lots of ethical and professional coin dealers around, but when it came to grading coins, the strong financial interest they had in their own inventory couldn't help but influence the way they viewed the coin.

And what about guarantees? Many collectors who tried to sell coins were surprised to find that a coin purchased from one dealer as an MS65 might become an MS63 in the eyes of another dealer a year or two down the road.

These issues posed serious problems for coin collectors prior to PCGS and the *Rare Coin Revolution*.

But it wouldn't be fair to blame coin dealers. This was standard operating procedure for an entire industry.

Independent, standardized grading, objectivity and grading guarantees were missing links that, if implemented, had the potential to provide improved consumer protection and strengthen the industry.

PCGS...The Grading Standard Embraced by an Entire Industry!

In an innovative move, the Professional Coin Grading Service entered the scene armed with a concept that would change the way the rare coin industry would conduct business forever. Professional coin dealers and collectors throughout the nation would support the concept mightily.

Third-party grading meant never having to rely on one person's grading opinion again. Instead, coins would be graded by consensus, utilizing the expertise and experience of a minimum of three professional numismatists--in an environment free of financial conflict. Once graded, PCGS would place each coin in a tamper-evident capsule. The first of its kind, the PCGS Numiscap™, offered solid protection for the coin, while providing PCGS with the ability to guarantee the grade. PCGS could now offer a true standard, objectivity, *and* an unprecedented cash-value guarantee to protect consumers against grading errors.

Today, PCGS celebrates its eighth anniversary, and continues to uphold a firm commitment to high standards of professionalism and the most reliable form of consumer protection known to collectors.

PCGS has introduced a lot of "firsts," but our success is owed to those who supported us in bringing widespread acceptance of third-party grading to the rare coin industry.

PCGS has now graded 3,397,692 coins with a cumulative declared value of $4,510,815,802.

The *Rare Coin Revolution* clearly continues to work to the best interest of collectors and dealers today.

There's never been a better time to have your coins graded by PCGS. For a complete list of services and the names of the PCGS authorized dealers nearest you, please contact the PCGS customer service department at 1-800-447-8848.

An Entire Industry Embraces Change:

February 1986. PCGS introduces third-party grading, encapsulation and a powerful cash-back grading guarantee. This unique combination of time-tested consumer safeguards continues to work in the best interest of today's collector.

MAKING MONEY FOR OUR CONSIGNORS AT AUCTION

LOT 1358 **1919. PCGS graded Mint State 68. Full Head, realized $38,500.00 at Superior's January Coin Auction.**

Dear Numismatist:

One of our clients consigned a Standing Liberty Quarter Set to our Pre-Long Beach auction in January, 1994. They were all graded by PCGS several years ago, but after careful study, our in-house experts felt that some of the coins had been undergraded.

We resubmitted the coins and as we had predicted, they were given higher grades. Our client realized extraordinary prices at auction. One in particular warrants special mention: Lot 1358 was a 1919 Standing Liberty Quarter PCGS graded Mint State 68 full head. We thought this coin was the finest ever graded! After much spirited bidding, this coin set a record price for a common date. It was bought by Jay Perino of The Mint for $38,500.00.

Over the years, Superior has made millions of dollars for our clients, by knowing which coins to resubmit for new grades. Why not take advantage of Superior's expertise and experience? Consign your collection to our auction house. We are currently accepting consignments for our May 29-31, 1994 Pre-Long Beach auction and our July 23-25, 1994 auction held prior to the ANA Convention in Detroit.

We're looking forward to hearing from you.

Best regards,

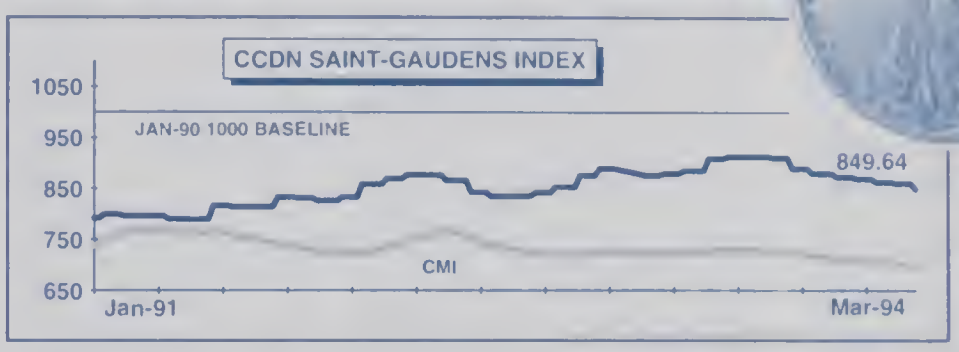
Pause in Long-Term Demand Growth for Saints Buffalo Nickels Continue to Own the Range

The certified market continues to turn in a mixed performance, with most of the charts continuing steady (but with a hint of weakness). As has been the case with this market for all too long now, downward adjustments are *just* outnumbering the Bid increases; not enough to cause a panic, *just* enough to be a bother. And, as has also been the case, the vast majority of Bids on the standard charts have been steady; in this week's ***Bluesheet***, well over 97% of the Bids were either stable or increased.



In a market that is slowly 'inching' downward, the minus signs seem to accumulate on the Supplemental charts that we run only once each month. This week's coverage of the $20 Saint-Gaudens is a case in point. A quick glance at the chart shows the cyclical nature of Saint pricing, but also demonstrates the overall upward trend in prices since January of 1991. The Saints have clearly outpaced the overall ***CMI***, and the chartist would look at these long-term trends and announce them ready for an upward movement. We are always leery of such predictions, but we have to admit a fondness for these coins. You get beauty, history, art, a 'solid' piece of gold, and all at some of the best prices in years. All this and prices on the 'upside of stable' should make a chart peppered with minus signs an invitation to a buying spree. We shall see.

Silver Commemoratives looked a little stronger this week, with plus signs actually out-gunning the declines. Gold Commems continue to show real strength with advances again out powering the discounted sells. Morgan Dollars are showing no signs of a rally despite the continued demand for these beauties; discounted sells and price adjustments continue to nick away at prices and enthusiasm. Peace Dollars were largely steady, but again on the minus side. Mint State Type which has shown few signs of strength for some time, was weak again; the declines due to discounted sells are simply putting a negative spin on the chart that the selective advances cannot overcome. Mint State Gold Type was more active than has been the recent case, but in the end simply turned in a mixed performance. Proof Type and Proof Gold Type were both overwhelmingly steady, with only a few changes scattered across the charts. Buffalo Nickels continue to be the 'brightest' chart in the ***Bluesheet***, with another upward surge in prices being recorded; Buffaloes (with a little help from the Gold Commems) are keeping the spirit of the next up-cycle alive. Among the other specialty series, Mercury Dimes were on the minus side of steady while Walking Liberty Halves turned in a stronger performance. Proof Singles remain steady, with only sporadic demand.

Collectors and Dealers Can Now Get Every U.S. Coin They Submit Graded and Slabbed...*even if the coin has a problem!*

. . . It means freedom of choice and freedom from all the other grading services who refuse to grade and encapsulate problem coins that are genuine.

"Introducing The New Improved PCI Certified Coin Capsules®

GREEN LABEL FOR "NO PROBLEM" COINS

OUR STANDARD CERTIFIED CAPSULE

Destined to make every coin you own (even the problem ones) More Valuable Than Ever Before!

Today, it only costs

$7.50

To get every coin you own in one of these clear, attractive, museum-quality encasements (slab) that is ultrasonically sealed.

RED LABEL FOR "PROBLEM" COINS

PROBLEM COIN CERTIFIED CAPSULE

DATELINE: 1993 CHATTANOOGA, TN

Effective immediately: When you submit U.S. coins . . . every one of them will be graded and encapsulated. Never before has any grading service offered such extensive attention to your coins. **Coins without any problems** will continue to be graded and holdered with the premium "old-familiar" GREEN INSERT LABEL. **Coins with problems** will now be graded and holdered with the new certified RED INSERT LABEL. These will be graded with the problem described and printed below the grade. Collectors and dealers can now get their coins graded, certified and slabbed even if the coin has a problem.

You make the choice between other grading services and PCI. And when you do please consider the following reasons that make the difference:

(1). PCI only charges $7.50 per coin (plus postage. etc.) to grade, authenticate, encapsulate and to process your order regardless of its value. Compare this to $50 or $23 or even $12!

(2). More collectors, dealers, individuals and banks (over 5,000 total) have submitted coins to PCI than any other grading service. We challenge any grading service to match our record beginning the day we opened on June 1, 1989 until now!

(3). Our standard express "turn-around" time from the day we receive your coins to the day we ship them out is 6 working days. At all of the other services this will cost you a minimum of $23! Our price is $7.50.

(4). Anyone may submit coins to PCI at the same low rates. The 2 other major grading services have formed exclusive dealer networks . . . thereby restricting who may get coins graded. Why do you think they charge so much? It's obviously money in the dealers pocket not yours! No longer do you have to go through an "in-crowd" to get consistently graded coins. It's your private business!

(5). Every genuine dated coin you now submit (except plugged, holed, altered or undistinguishable) will be encapsulated in either the GREEN LABEL or RED LABEL slab. Collectors know that coins in slabs are generally worth more and now you can get in on the profits. PCI does reserve the right to refuse to encapsulate any coin for any reason it feels would be detrimental to the numismatic industry.

(6). Any purchaser or submitter of a PCI coin who believes their coin(s) is misgraded, improperly attributed, or has questionable authenticity may resubmit the slab for a re-evaluation and/or reslabbing. The resubmitted process of evaluation and/or reselling will be paid for by PCI (excluding return postage and insurance which you pay).

6 DAY EXPRESS SERVICE SLAB SUBMITTAL FORM

PCI

Coins will be shipped on or before the 6th working day after we receive them and will be sent U.S. Registered Mail.

A Hard Look at Mint State Type in 1994
Leaders & Laggards Tell the Story

We will admit to be 'closet' optimists — we keep watching the Mint State Type chart, in the hope that we will see enough plus signs to begin writing about 'the end of this slump'. And each week we see a handful of plus signs, *modestly* overwhelmed by two handfuls of minuses. As we've noted, this is *insufficient* "Bad News" to get excited about, but sufficiently annoying due to the absence of "Good News". The Mint State Type chart represents a goodly portion of the entire rare coin market, and we know that many dealers judge the health of the market by looking here and at Gold Type.

The end of the First Quarter of 1994 seemed an appropriate time to take a hard look at recent developments in Mint State Type. As you probably expected, we have a little "Bad News" and not very much "Good News". The Mint State Type CMI started the year at 732.41 and has since steadily and slowly receded to the 720.01 level. We ran the individual Bids on the entire chart, and again, you probably will not be surprised by the results: 3% of the Bids rose; 72% were steady; and 25% declined. Looking at the averages across the chart confirms the situation. The 'average' Bid in Mint State Type declined 2.1% since January, with the biggest declines coming in the MS63 through MS65 columns — the *heart* of the market (although, to be fair, the biggest advances came in these *same* columns!). Again, the declines aren't catastrophic; they aren't even 'negative' enough to be worth a headline. The real impact comes in their *relentless* nature; week after week, discounted sells keep chipping away at the plus activity.

While the averages describe a market just "a little South of steady", a look at one of our 'famous' Leaders & Laggards charts confirms yet again that it is possible to make enormous profits, or suffer painful losses, even in a "steady" market.

Depending upon your buying strategy, you can justify investing in either the Leaders or the Laggards. One thing is sure about the Laggards, however; you sure can get 'a lot' of coin for 'a lot less' than you might have paid in January. That is good news for collectors, but not for their dealers in an inventory-based trade.

If you have coins to sell, please contact us.

Silvano DiGenova and Stuart Levine of Tangible Investments of America, Inc. and Steven Contursi of S.L. Contursi, Inc. will be merging their respective rare coin enterprises. This remarkable combination of talent will combine to form a major rare coin organization of unprecedented experience, knowledge, talent and integrity.

AMONG THEIR COMBINED ACHIEVEMENTS ARE:

- ✶ Founding member of PCGS, today the largest third party grading service. Also instrumental in assembling the PCGS grading set.
- ✶ Orchestrated the sale of the famous Wayne Miller Silver Dollar collection, which realized over $1 million in 1986.
- ✶ Purchased and sold the Clifford-Kagin Territorial gold collection valued at over $2.9 million in 1988.
- ✶ Major buyers in the famous Garrett, Bareford, Eliasberg, Brand and Carter sales.
- ✶ As Senior Vice President, Steve Contursi guided the growth of Blanchard and Company, Inc. from a $1/2 million in U.S. numismatic sales to over $4 million in sales per month.
- ✶ Key buyer in the Norweb collection auctions, purchasing in excess of 10% of the entire collection.
- ✶ Number one purchasers in the:
  James A. Stack sale
  Trompeter Gold sale
  Floyd Starr sale
  Stack's 55th Anniversary sale
  these and many, many more sales.
- ✶ Purchased the last part of the fabled Lavrene Redfield hoard.

Together these unique partners have purchased in excess of $1/2 billion in U.S. rare coins. Now they combine their numismatic expertise, overall integrity and financial stability. Our multi-million dollar inventory will speak for itself. This partnership combines over fifty years of numismatic experience. Call today and see what a difference it is to deal with a real Rare Coin firm.

Proof Type Holding Steady
More Leaders & Laggards; More Opportunities

Last week's ***Bluesheet*** presented "Leaders & Laggards" charts for Mint State Type since the start of the year, in this issue, we'll take a similar look at the Proof Type coins. While Proof Types don't represent as large a *percentage* of the *entire* market as Mint State Types, the listings provide coverage for tens of thousands of certified Proof coins in the marketplace. When an up-cycle begins, you can be sure that its effects will be seen in the Proof Type columns.

It will come as no surprise that Proof Type has behaved a lot like Mint State Type since January. During the First Quarter, the Proof Type ***CMI*** dropped ever so slowly (but *steadily*) from 719.78 to 711.49; not a significant drop, to be sure, but like the 12-point drop in the Mint State ***CMI***, notable for its *relentless*, depressing quality. Running the changes in individual Proof Type Bids produced results a little more encouraging: 6% of the Proof Type Bids *rose* (compared to 3% of Mint State Type); 70% of Proof Type Bids were ***steady*** (compared to 72% for Mint State Type); and, 24% of Proof Type Bids ***declined*** over the three month period (compared to 25% for Mint State Type). The really good news for Proof Type is that the "*average*" Bid during the Quarter declined only 1.7%, compared to the 2.1% *average* decline for Mint State Type. Still, these figures are notable for their similarities; again we show a steady market, but one where discounted sells are just slightly "outgunning" the advances.

Disregarding the "*average*" for a moment, the real test of any market is whether you can find the material that you are seeking, and at a price that you are willing to pay. The *floating supply* of nice coins has been on the increase recently which has been good news for buyers although they probably need to pay more than *unseen* levels for "nice" coins. Positive results are still being enjoyed by the major auction sales and recent bourse activity has been "solid to "pleasing". The upcoming Central States Show will provide dealers with still another opportunity to "get a feel" for the market and to *participate* in its future direction.

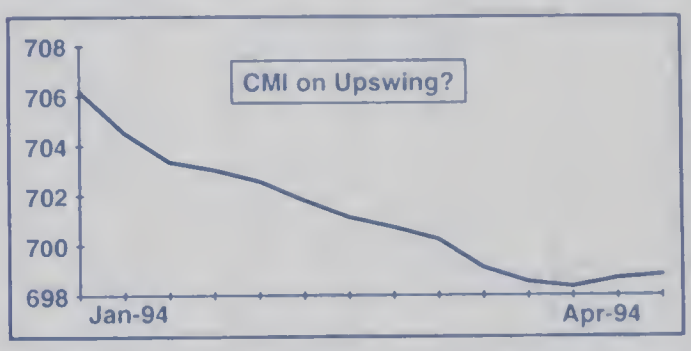
Market Strengthens on Bad News in Stocks
CMI Rises for the Second Week!

It was a pleasant sight indeed this week, as plus signs overwhelmed declines by more than two-to-one! It seems traditional in the financial press to write articles explaining market movements by assigning the explanation to today's headline story: "The stock market rose today on news of — fill in the blank —". This works well enough, except on those *slow* 'news' days when the Dow moves substantially but the only headline is the birth of a two-headed cow! Well, following in that fine tradition, we are going to ascribe the strengthening of the coin market to the most notable financial story - the roller coaster ride that the *DJIA* has been on for the last two weeks. The *slow* declines in the Dow, coming off its Jan. 31 high, turned volatile last week; 50-point and 75-point swings are becoming the norm.

We have heard from many dealers that they expect the short-term volatility in the stock market, as well as its long-term trend (down 300+ points since January), to benefit the coin market. If enough dealers believe that, and begin to increase their Bidding activity, then the coin market will immediately strengthen. We are hearing reports from dealers on a pick-up in retail activity, as well, so this may be more than a self-fulfilling prophecy. The good news on the charts comes from 'every quarter'; we are seeing increased Bidding activity, increased support at current levels, and an increased number of plus signs. That is good news indeed.

The strengthening of the coin market was noticed across virtually every chart; in fact, plus signs outnumbered declines on every chart *except* Mint State Type. Silver Commemoratives were strong in MS65 and MS66, with some advances in the long-neglected MS67s. Gold Commems continue to demonstrate sustained strength, although here most of the increases came *below* MS65. Morgan Dollars were steady, with increases just slightly outnumbering the declines; the most notable story here, which is definitely good news, is a substantial increase in the number of supporting Bids at current levels. Peace Dollars were likewise steady, with only a handful of scattered changes. Mint State Type was largely steady, but surprising that we didn't see more advances on this important market segment. Mint State Gold Type was strong, especially *below* MS65. Proof Type was on the plus side of steady, with advances concentrated in the Nickel Types. Proof Gold Type was steady, but enjoyed some scattered rises. Buffalo Nickels were hot again this week, with most of the advances coming in MS63 & MS64. Mercury Dimes were steady. Walking Liberty Halves rose, with most of the advances in MS64 through MS66. Proof Singles were steady.



The good news is also reflected in our *CMI*. After the slow but steady decline that has characterized this market since January (in fact, the *CMI* had declined 33 straight weeks before last week's reversal), the *CMI* turned up again, ***for the second consecutive week!*** Maybe there is something to headline watching.

Bid Solidification Continues CMI Moves Higher — Again

There is nothing like a *satisfying* coin show to encourage dealer activity and last weekend's Central States Show in Indianapolis certainly left dealers feeling "*satisfied*". As one pointed out, this was a "simple" case of "activity begetting activity"; that is certainly more pleasant than 'inactivity begetting inactivity'. At Central States, there was a noticeable increase in the levels of both retail and wholesale activity. Regardless of whether you subscribe to explanations based on Whitewater, the stock market, bullion movements, M1, or MI5, suddenly there seem to be more buyers concluding that coins are *very* attractively priced.

At this point, it needs to be stressed that *most* of the positive trends we see in the market are *not* resulting in plus signs. There is a *substantial* increase in Bidding activity, but dealers seem content to support current levels. To be sure, the number of plus signs is increasing, and there are fewer declines; despite the 2-to-1 edge of plus signs, we would still characterize the overall market as *stable*. One dealer noted that this was just what the market needed: "Solidifying, not necessarily advancing just yet".

The advances are coming on a broad range of material. Gold Commemoratives were advancing nicely, as has been their recent inclination, while the Silver Commems were steady with mixed changes. Morgan Dollars were steady with balanced changes, with the MS64 column attracting plus signs; here, too, the discounted selling has substantially declined. Peace Dollars were also steady, with most of the Bid changes being increases (with MS64 also strong).

Proof Type registered some solid advances, with plus signs outnumbering declines 49 to 2. Nickels continue to draw attention. Unfortunately, as nearly all have noted, Mint State Type is still quite lethargic. To put it bluntly, as did one major dealer, "If Mint State Type doesn't move, it *ain't* a rally!" Hard to argue that logic, and we won't, but we will note that market segments have been moving independently for about five years now. Mint State Gold saw a large number of changes, which were nearly equally divided between advances (especially in MS63 & MS64) and declines. Proof Gold Type ended the week on the plus side of steady.

The unevenness of this market shows readily among the specialty series. Buffalo Nickels below MS67 were "on-again" this week, with still another major surge generating dozens of plus signs. Mercury Dimes were steady, with a few changes scattered across the chart. Walking Liberty Halves were steady, with the advances in the later dates edging out the declines. Proof Singles enjoyed some substantial advances.

We are also pleased to acknowledge the compliments received lately from several dealers who have reported using our charts (both those in the ***Bluesheet*** and the ***Greysheet***) as effective sales tools. The charts that we print (as well as those produced to order) clearly show the weaknesses of the post-1989 market, but they *also* illustrate the longer term cyclicality of coin prices. It is not especially difficult, in a cyclical marketplace, to sell on the merits of buying when prices are down, especially when *indications* are that prices are *starting* to rise again. We know better than to predict a Rally, but we also know from long experience that if enough buyers anticipate a rally, then a rally it will be!

INVENTORY HIGHLIGHTS

1866 Two Cent Piece PCGS MS-66 (Red) PCGS/NGC Population: 5/2
A stunning example of this oddball variety. Full mint lustre radiates from both sides. Also special due to the extremely low population figures for the date **$3,450.00**

1865 Three Cent Silver PCGS PR-66 PCGS/NGC Population: 8/8
A brilliant and beautiful cameo from the Civil War era **$2,950.00**

1879/8 Shield Nickel PCGS PR-67 PCGS/NGC Population: 6/5
A technical and visual wonder coin. Brilliant, strongly mirrored surfaces **$2,395.00**

1857-O (Stars) Seated Dime PCGS MS-67 PCGS/NGC Population: 2/2
An amazing coin from the New Orleans mint. Certainly, no aspect of this fine example could be improved upon. Tied for the finest known and will someday be part of an awesome collection **$9,750.00**

1839 (No Drapery) Seated Quarter NGC MS-64 PCGS/NGC Population: 2/3
Perhaps our favorite coin in inventory in terms of rarity and value. The 'No Drapery' variety was minted for just three years (1838-40). Between PCGS and NGC, just 21 examples for the entire type have been designated MS-64 with just 4 pieces achieving better. The 1839 and 1840 also happen to be much tougher than the 1838 (which accounts for 16 of the 21 MS-64's known) **$4,595.00**

1865 (No Motto) Seated Quarter PCGS PR-66 PCGS/NGC Population: 2/2
This elusive issue is one of just 13 graded by PCGS for the entire type, spanning from 1841 to 1865!
Liberty is frosty white with deeply reflective, golden fields surrounding her **$7,350.00**

1908-O Barber Quarter PCGS MS-66 PCGS/NGC Population: 4/0
A heavenly assortment of color adorns both sides of this better-date Barber. Just one coin has graded higher **$2,895.00**

1917 (Type I) Standing Quarter NGC MS-67 (Full-Head) PCGS/NGC Population: 2/1
Everything the lofty grade demands . . . extraordinary strike, lustre and quality. An example deserving of a home in the finest known collection of this type/design **$7,650.00**

1946 Walking Liberty Half PCGS MS-67 PCGS/NGC Population: 2/3
Tied for the finest known. An immaculate, fully brilliant example of this glorious design which will no doubt be acquired for one of the finest known Walker collections **$4,250.00**

1875-S Trade Dollar NGC MS-65 PCGS/NGC Population: 7/12
It is a rare occasion when you encounter a Trade Dollar in Gem condition. One of the rarest of all American type coins, and one of the most stunning due to their size and beauty. Lovely, golden color accents proof like surfaces. Exhibits perfect detail of design **$5,950.00**

1935 Hudson Commemorative PCGS MS-66 PCGS/NGC Population: 45/23
Celebrating the 150th anniversary of Hudson, New York. One of the toughest silver Commems to locate in Gem and higher grades - especially with superb eye-appeal **$3,450.00**

1937-D Oregon Trail Commemorative PCGS MS-68 PCGS/NGC Population: 13/12
Popularly considered America's most beautiful Commemorative design, it honors the settlers who made the dangerous trek across America on the Oregon Trail. A nearly impossible coin to beat with wonderful appeal on both a technical and aesthetic level **$3,495.00**

CERTIFIED COIN DEALER newsletter

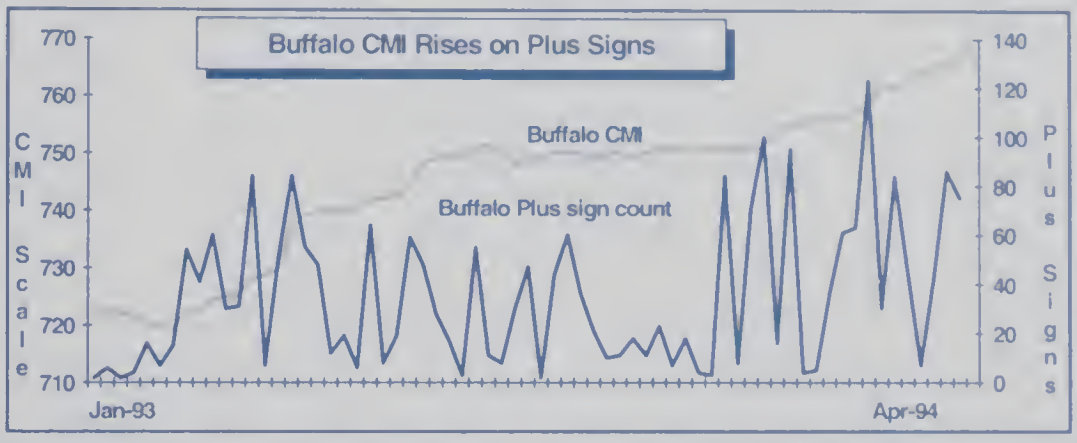
Vol. IX No. 16 | April 22, 1994 | Single copy price $4.00

Activity Still Strong; Advances Still Selective
Dealers Prefer Buffaloes As Bellwether Gauge

Over the last two weeks, Buffalo Nickels were "hot" again generating dozens upon dozens of plus signs. As our readers know, we have been following this series closely and marveling at the consistency of the 'alternating' demand (i.e. up two weeks, steady the next, up two weeks, etc.). Well, the Buffs have surged forward again this week; make it four weeks in a row, and we'll declare this a "stampede". If only Buffaloes were the bellwether of the entire market; think where the overall CMI would be now!

The Chart illustrates the additive effect of the plus signs since January of 1993 (the right-hand scale measures the raw count of plus signs in the weekly ***Bluesheet***). While the count of plus signs may vary greatly from week to week, the cumulative effect of all these advances (more than **2300**!) is evident in the Buffalo **CMI**, which has been climbing steadily.



Activity continues to hold at a higher level, but we are seeing fewer plus signs; both dealers and their customers seem to be happy at current levels. However, and it is a big *however*, we note that dealers have become increasingly secretive about the coins they want and the price they are willing to pay. That may be an appropriate strategy for this market, and the 'broadcasting' of demand may mean the payment of top dollar; it is usually preferable to fill Want Lists at lower prices. When a dealer does need to *actively* pursue selected items in the marketplace, it is not uncommon to see his buying offer 10% to 20% above previous levels. Price negotiations in this market can get pretty interesting!

Silver Commemoratives were steady with only minor adjustments, as were Gold Commems. Morgan & Peace Dollars were fairly active in mixed trading, with selected issues showing substantial Bid increases (in the hopes of drawing out a specimen). Mint State Type was steady and continues to show few signs of inspiring (or *reflecting*) a marked rally. Mint State Gold was extremely active, with declines edging out the advances; dealers will want to note the significant adjustments this week. Proof Type was steady with some increased demand in the Gem columns; as has been the case, Proof Type is slowly rising on the balance of positive adjustments. Proof Gold Type remains steady.

Among the specialty series we will note one more aspect to the climb in Buffalo prices: virtually all of the increases are coming below MS67. Mercury Dimes ended the week down slightly, while Walking Liberty Half Dollars closed with some solid increases in the 'middle' grades. Proof Singles have been showing more signs of life lately, with scattered advances.

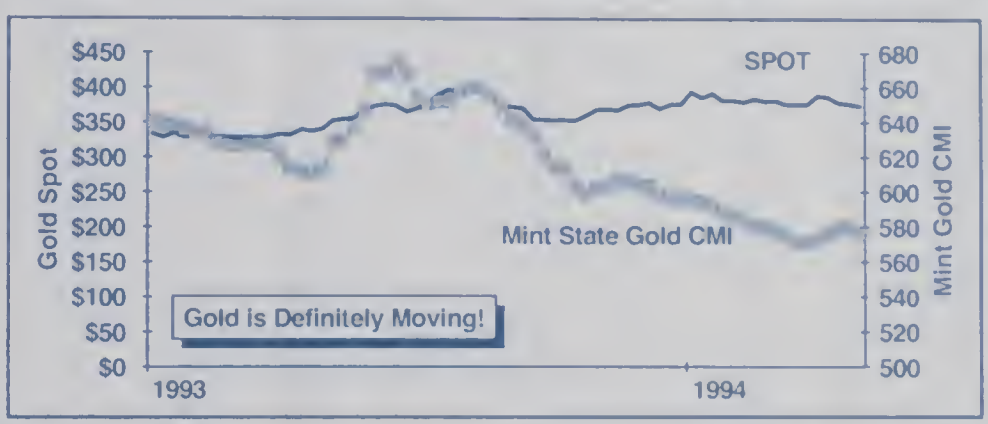
Steady, Steady, Steady: Three Most Important Factors in Market Strength

Market activity continues to show steady levels and demand; while this leaves us little in the way of snappy headlines, the growing strength is undoubtedly 'good' for the market. A little of the 'oomph' has gone out of the market, and we seem to be seeing many charts *just* on the minus side of steady. Silver Commemoratives were slightly on the down side of steady, with most on the advances on the better grades. Gold Commems were mixed, with advances on the lower grades. Morgan Dollar declines outnumbered advances three-to-one, but most of the declines were associated with the generics and lower-value pieces. Peace Dollars were likewise on the down side of steady. Mint State Type was steady, with a few scattered discounted sells generating minus signs; dealers may be heard lamenting "Enough already!" At least Mint State Gold Type enjoyed substantial advances (the 'flipside' of last week). Proof Type continues to advance steadily (and slowly). Proof Gold Type is simply steady. Among the specialty series, Buffalo Nickels are booming 'one more time'; this is a habit we could learn to enjoy. Mercury Dimes remain steady, while Walking Liberty generics advanced. Proof Singles, after their recent increases, showed scattered declines.



A dealer friend recently asked us what we expected from the relationship between Gold Spot and Mint State Gold Type during 1994. We began to list so many caveats that we forgot what the question was. One thing seems reasonable — the Chinese crystal ball is likely to bring its owner real riches. Since the beginning of 1994, the long-term trend of gold is definitely up (while most dealers need to follow the day-to-day changes in spot, here we need to look long term). Over the same time period, the Mint State Gold Type *CMI* trend is downward.

The chart shows this relationship over the last sixteen months, note that the left scale is Spot price Dollars, while the right scale is our usual *CMI* indexing (each square represents one week). In early '93, while spot was rising slowly, the Gold *CMI* was declining slowly. As the pace of gold's rise began to pick up, the *CMI* took a quick leap. Spot turned down after mid-'93, as did the *CMI*, while spot has recovered and resumed its upward trend, the *CMI* continues to decline. While the *visual* gap between Spot and *CMI* is *growing* on this chart, the appearance is a function of scaling; however, it does illustrate nicely that the Gold *CMI* has been declining while Spot has been rising. We suspect that this knowledge was behind our friend's question, as his predictions call for "small but useful" profits to be made in Mint State Gold over the next year. We'll see how many dealers agree at next week's 6th National Gold Convention in St. Louis. *If* Gold continues to rise, ultimately it must pull the *CMI* along with it; we just haven't seen the foreign crisis or domestic agenda that is going to motivate Gold towards $500.

WE NEED YOUR RARE COINS

If you have coins to sell, please contact us.

Silvano DiGenova and Stuart Levine of Tangible Investments of America, Inc and Steven Contursi of S.L. Contursi, Inc will be merging their respective rare coin enterprises. This remarkable combination of talent will combine to form a major rare coin organization of unprecedented experience, knowledge, talent and integrity

AMONG THEIR COMBINED ACHIEVEMENTS ARE:

- ★ Founding member of PCGS, today the largest third party grading service. Also instrumental in assembling the PCGS grading set.
- ★ Orchestrated the sale of the famous Wayne Miller Silver Dollar collection, which realized over $1 million in 1986.
- ★ Purchased and sold the Clifford-Kagin Territorial gold collection valued at over $2.9 million in 1988.
- ★ Major buyers in the famous Garrett, Bareford, Eliasberg, Brand and Carter sales.
- ★ As Senior Vice President, Steve Contursi guided the growth of Blanchard and Company, Inc. from a $1/2 million in U.S. numismatic sales to over $4 million in sales per month.
- ★ Key buyer in the Norweb collection auctions, purchasing in excess of 10% of the entire collection.
- ★ Number one purchasers in the:
  - James A. Stack sale
  - Trompeter Gold sale
  - Floyd Starr sale
  - Stack's 55th Anniversary sale
  - these and many, many more sales.
- ★ Purchased the last part of the fabled Lavrene Redfield hoard.

Together these unique partners have purchased in excess of $1/2 billion in U.S. rare coins. Now they combine their numismatic expertise, overall integrity and financial stability. Our multi-million dollar inventory will speak for itself. This partnership combines over fifty years of numismatic experience. Call today and see what a difference it is to deal with a real Rare Coin firm.

Buffaloes Still Hogging Spotlight
Steady Market Needs More Leaders

There is *no* question about it — flat markets make *lousy* headlines. And, a flat market is what we have, with very few exceptions. Now, I like stability as much as the next numismatist, but most dealers have pointed out to us that they would be a lot happier if more of the changes in the market were coming in on the 'north side' of steady. Most remain glad to see the market strengthening at these levels, but as many dealers have pointed out, it needs to be 'just a little bit stronger' to inspire any confidence in a continuing rally. To quote another dealer, 'it takes more than Gold Commems and Buffaloes to support a rally'.

Several weeks ago, I noted that the Buffalo Nickels had been lengthening the "on-again" phase of their cyclicality. I am pleased to report that Buffaloes are now in their fifth week in the 'solid plus' column, and hereby agree to the use of the word *"stampede"* (even if it is a *mild* one with periodic breathers). This year alone, the Buff ***CMI*** has risen more than 15 points to lead the charts (and more than 48 points since January of 1993!). Having a few dealers devoting attention to a series, sustained by the interest generated through some solid marketing efforts, shows what can be done even in a flat market. On a daily basis, we see how much influence individual dealers can exert on a particular series; that influence can be positive, through the publication of higher Bids, or negative, through unnecessarily discounted sells. There are a number of 'better' Buffaloes in Heritage's Bullet Sale being held this weekend at the National Gold Convention in St. Louis; we will note the enthusiasm of the Bidders.

Silver Commemoratives were steady, with mixed minor adjustments; most of the increases were in the MS64 column. Gold Commem activity was also mixed with scattered advances. Morgan Dollars will show a decline in CMI, but most of the movement can be attributed to slight adjustments in generics; selected discounts still mark really ancient sellers. Peace Dollars were steady, with mixed adjustments. Mint State Type remains the *anchor* of the market (in several senses of the word); at the heart of the rare coin market, steady prices here mean stability, but selected discounts in the MS63-66 columns continue to exert a dragging influence on any market revival. Mint State Gold Type is "off again" this week, with most of the weakness below MS65; declines outnumber advances two-to-one. Just remember — someday gold coins will be valuable again.

Proof Type shows very few changes with most of the advances coming in the 'nickel' coinages. Proof Gold Type is very strong in the Pr61-Pr67 columns. Buffalo Nickels turned in another solid performance this week with most of the advances coming in the MS63 and MS64 columns. Mercury Dimes were steady, with few changes in current levels. Walkers were on the plus side of mixed this week, with most of the advances coming on minor rises for the late-date generics. Proof Singles showed some weakness in the Half Dollars.

This week's ***Bluesheet*** contains the supplemental charts for the ANACS, PCI, INS, & NCI grading services. Readers are reminded that sight unseen bidding for these coins remains at a modest level. Only a few dealers maintain a market presence, and some services receive no Bidding activity. Most trading activity takes place sight seen, as is true for most coins in the marketplace.

"The COIN MARKET INVESTIGATOR"

Our goal is to produce the finest, most usable, coin related newsletter that you've ever read!

In each issue we investigate a variety of topics, offer valuable how-to information, answer questions from readers, and review current coin market conditions.

Reader reaction to the first two issues has been overwhelmingly positive.

Please consider these risk-free offers. A subscription to the next six issues of *The Coin Market Investigator* is available for just $30. If you are not delighted with the first issue you receive, just return it, and your $30 will be refunded.

Or, order a sample copy for $5. You may return this as well if you are not 100% satisfied.

We encourage you to give this informative publication a try. As you can see, there is no obligation---only lots of opportunities.

Market Continues Mostly Steady Dealers Looking to Long Beach

The market continues its recent trend with some incremental declines causing the market to drift *just* to the minus side of steady. Activity is "good" at current levels as Buyers and Sellers seem to share a concept of value. The good news is that this week's ***Bluesheet*** has only about a dozen more declines than advances, but the bad news is that Buffalo Nickels and Walking Liberty Halves account for fully half of the advances!

Superior Auction Galleries will be hosting *The May 30-31 1994 U.S. Coin Auction* prior to next month's Long Beach Coin Show (June 2-5). The most notable lot is the Dexter specimen of the 1804 Silver Dollar, a wonderful coin that Superior last had the pleasure of offering in its Baltimore '93 sale. Any Auction containing an 1804 Dollar is sure to generate excitement, and this will be no exception. Important collections of Half Cents, Half Dimes, Seated Liberty Dimes, Silver Commemoratives, Gold Dollars & Patterns will attract the specialists as well. Among the other certified highlights: (see inset)

The selection of Gem Commems in the Superior Sale brings to mind a recent note from a dealer friend concerning his ***sight-seen*** purchase of a real nice Connecticut (graded PCGS65) at $575. Another dealer inspecting his stock picked out this attractive Gem, but turned it down at $600 "because the ***Bluesheet*** was only $458." Periodically, it seems we need to remind the Trade, as well as any collectors using our publications that levels in the *Greysheet* are for ***sight seen*** purchases, while ***Bluesheet*** Bids are for ***sight unseen*** transactions. Because beauty is in the eye of the beholder, virtually all *Greysheet* Bids are higher than ***Bluesheet***. *Greysheet* Bid for the MS65 Connecticut is $555 with Ask at $610; the $575 Buy price and $600 Ask of our dealer friend were right on the *money*!

The current $458 ***Bluesheet*** Bid for a PCGS coin is an accurate reflection of how the market currently views that transaction (perhaps "view" isn't the best terminology for a ***sight unseen*** coin!), but it is also *irrelevant* to this ***sight-seen*** examination of a better coin! Since there can be a fairly wide range of appearances for coins of "identical" grade, ***sight-unseen*** Bids (as reported in the ***Bluesheet***) reflect the actions of dealers who must factor in the possibility of buying one of the less attractive specimens. For *rarer* coins, ***Bluesheet*** Bid might be better considered as the *bottom* of the range for negotiations; we call special attention to the concept of "*rarer*", since on generic issues the range for negotiating will be much closer to ***Bluesheet*** Bid. On *rarer* issues, or on coins that come weakly struck, dealers want to examine first *before* offering a level commensurate with a better specimen.

WE NEED YOUR RARE COINS

If you have coins to sell, please contact us.

Silvano DiGenova and Stuart Levine of Tangible Investments of America, Inc. and Steven Contursi of S.L. Contursi, Inc. will be merging their respective rare coin enterprises. This remarkable combination of talent will combine to form a major rare coin organization of unprecedented experience, knowledge, talent and integrity.

AMONG THEIR COMBINED ACHIEVEMENTS ARE:

- ★ Founding member of PCGS, today the largest third party grading service. Also instrumental in assembling the PCGS grading set.
- ★ Orchestrated the sale of the famous Wayne Miller Silver Dollar collection, which realized over $1 million in 1986.
- ★ Purchased and sold the Clifford-Kagin Territorial gold collection valued at over $2.9 million in 1988.
- ★ Major buyers in the famous Garrett, Bareford, Eliasberg, Brand and Carter sales.
- ★ As Senior Vice President, Steve Contursi guided the growth of Blanchard and Company, Inc. from a $1/2 million in U.S. numismatic sales to over $4 million in sales per month.
- ★ Key buyer in the Norweb collection auctions, purchasing in excess of 10% of the entire collection.
- ★ Number one purchasers in the:
  James A. Stack sale
  Trompeter Gold sale
  Floyd Starr sale
  Stack's 55th Anniversary sale
  these and many, many more sales.
- ★ Purchased the last part of the fabled Lavrene Redfield hoard.

Together these unique partners have purchased in excess of $1/2 billion in U.S. rare coins. Now they combine their numismatic expertise, overall integrity and financial stability. Our multi-million dollar inventory will speak for itself. This partnership combines over fifty years of numismatic experience. Call today and see what a difference it is to deal with a real Rare Coin firm.

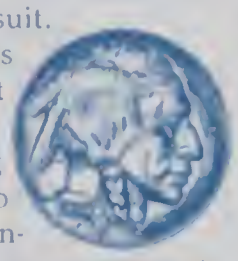
Buffalo "Stampede" Continues
Trading Will Be Heard at Long Beach

Buffalo Nickels again provide the brightest spot in the market, with another liberal sprinkling of advances. With plus signs peppering the Buff chart, it seemed appropriate to take a closer look at which issues were the best performers. Before comparing the Bids from one year ago I will admit to expecting the most solid increases to be on those coins with populations between 5 and 15; common enough to be *obtained*, but certainly rare enough to be *worthy* of pursuit. Coins that are *rare* by *tradition*, and whose rarity is *proven* by population. Overall, these are the coins that have been demonstrating real market strength.



While Long Beach dealers will naturally be bringing material across the entirety of numismatics, it is also typical for them to make a special effort to bring inventory in the hottest areas of the market. That being the case, we expect to see a lot of Buffaloes on the Bourse. For the specialists, this will make the Long Beach Show just that much more special.

Overall, and especially compared to the rest of the coin market, Buffaloes have done very well since May 21, 1993. The Buffalo CMI one year ago was 740.05; today it stands at 774.04; the 33.9 increase was the best performance of any series. Of the 680 issues priced in the ***Bluesheet***, 291 (42.8% rose), 295 (43.4%) were steady, and only 94 (13.8%) declined. Of the top twenty percentage performers over the year, populations ranged from 0 to 2051 pieces, a pretty hefty range. This kind of rarity is definitely *not* the determining factor behind the strength in Buffaloes. In fact, the range is so great, that it makes even averages useless. Of the "stars" below; note that only two have populations in the 5-15 range. Not to weasel out of the original hypothesis, *maybe* we should be looking at combined PCGS and NGC populations.

Just out of curiosity, I also looked at the ten worst Buffalo performers. Their populations ranged from 2 to 151 with more than half having pops below 15 pieces. The top twenty leaders included no MS67s, but 5 MS66s and 9 MS65s; the ten laggards included 8 MS67s and 2 MS66s. Hmmm.

Which Series Will Star? Long Beach Will Provide Answer

We have spent a lot of time looking at the Buffalo Nickel chart lately, and for good reason. Buffaloes are the strongest area of a market that is in need of some heroes at the moment. Without taking anything away from the Butts, however, it also needs to be mentioned that there are a lot of *contrarians* (and *semi-contrarians*) out there. The true contrarian, by definition, likes to go against the market; that is, when Gold Commems are most out of favor the contrarian will be found buying them. The logic behind this discipline (and it does require *discipline*) is that the greatest profits are made by buying at the lowest level and selling at the highest. The problem? It takes fortitude, nerve, and a few other ingredients to constantly bet *against* the market. The contrarian coin investor does have one advantage — the knowledge that the market (and indeed, market segments) move cyclically.

There is one other problem with being a *successful* contrarian: *timing is everything*. When Gold Commems began to drop in late 1989, contrarians didn't rush in after the first 10% decline; to have been too anxious would have meant losses riding the market down. Dollars aren't put at risk until the market is ready to turn, or in fact has already started to turn. Timing when to *sell* is even more interesting, since demand can evaporate fairly quickly once a peak has passed. Many successful investors sell on the way up, taking profits along the way.

More commonly found in numismatic circles are the *semi-contrarians*, those investors who invest in the *most popular* series that happen to be currently out of favor. It isn't enough for them that a particular series has fallen, even substantially; they are just as interested in the overall *demand* for *that series*. Simply, many more numismatists collect Walking Liberty Half Dollars than Gold Commems. The profits to be gained from buying Walkers at their bottom may not be as great, but they feel that the risk is substantially lessened by their larger collector base. Logically, the most popular series may not fall as far, because of the greater demand established by their larger collector base; however, the demand during a boom can be just as intense.

Several dealers have predicted that activity at the Long Beach would be dominated by the collector coins. Among the series mentioned were Buffaloes, Walkers, and high grade circ Type. The Walker CMI has declined from the 754.71 of one year ago to the current 747.32, yet individual coins have produced some nice profits.

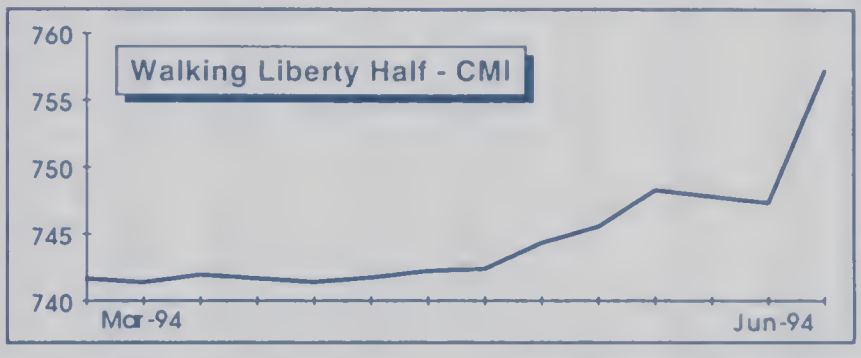
Collectors Encouraged By Steady Market
Will Long Beach Help the Hobby Grow?

Let's set the stage. For a long time the market has been *unspectacularly* steady; as we often phrased it, *just* on the 'south side' of steady. Coins are trading at current levels, and coins are selling nicely at auction (Bowers & Merena's sale exceeded $2.5 million, and Superior's sale likewise). Dealers report that their sales are 'generally O.K. *Not a bad market, but there are a few nagging problems.* Discounted sells, while small in number, are chipping away at Bid levels; in the absence of compensating plus signs, levels are *slowly* drifting downward. Customer activity is not spread evenly across the dealer community; a few dealers are having their best year ever, most are not. With the exception of Buffalo Nickels, no series has been able to sustain even a small rally over the past year. The 'good news' outweighs the 'bad', but few dealers see a rally coming soon.



This week, another of the 'collector' series - Walking Liberty Halves - has been showing life. The Walker *CMI* has been mostly rising since early March. More dealers are predicting that this will be a Long Beach dominated by 'collector coins'. What will make this a great Long Beach?

I consistently hear from dealers whose dedication to serving their customers has been 'paying off'. Extra attention paid to Want Lists, to education, to coin selection, to 'public relations' has helped expand the purchasing patterns of their collectors. Current Bid levels are helping, with the steady market producing confidence; when the right coin comes along at the right price, it's a sale. What worries these dealers? The lack of an expanding market — too few *new* collectors coming into the hobby.

So, how to introduce a new generation of collectors to numismatics? In this steady market, there are no catchy headlines to attract the new collector. Results from the last five years won't inspire many new investors. Are children coming home from school and begging Mom & Dad to take them to the coin shop the way that Pogs have captivated them now? Now, let me make it perfectly clear that I am *not* suggesting that Pogs are the answer to the doldrums in the coin community. At least not directly (despite the several dealers who are 'loading up' on Pogs at Long Beach, in the hopes of enticing young collectors to enter their shops). Still, Pogs, Stamps and Baseball Cards may provide a clue.

While some coin purists were upset when Long Beach expanded their Stamp and Baseball Card sections, the increase in foot traffic meant more customers *viewing* the coin bourse. And some of those lookers were turned into customers and *coin* collectors. The reality of life in a hobby business just may be that it ***is easier to turn a collector into a coin collector than it is to attract the attention of a non-collector!*** When the Long Beach Show fills their expanded space later this year, it will be up to the coin dealers to capture more customers. Every collector coming to Long Beach is a potential *coin* collector.

CERTIFIED COIN DEALER newsletter

Vol. IX No. 23 | June 10, 1994 | Single copy price $4.00

Quiet Market Follows Long Beach Auctions Garner Majority of Sales

The coin market was quieter than expected following the Long Beach Coin Show. Dealers (both buyers and sellers), who last weekend had seemed quite pleased with the bourse trading, had spoken expectantly of higher levels of activity *based on that bourse action*. Instead, there was a slight *decrease* in the levels this week, with a little pick-up in the discounted selling. Dealers do seem to be concentrating on selling, no doubt to retail their auction and bourse purchases. Collectors who missed a treasure on the block often have a second chance as dealers trim their positions.

The auction purchases were sizable, too. Bowers and Merena's *Burke & Clemente Collections Sale* realized over $2.5 million. Superior Auction Galleries' *The May 30-31, 1994 U.S. Coin Auction*, with some lovely certified pieces, realized $3,907,692. Heritage's Long Beach Bullet Sale added another $839,016 of certified coins into the market. The 1804 Dexter Dollar, which was the centerpiece of the Superior Auction, sold instead by Private Treaty to a major dealer; while full details have not yet been announced, the price is *not* included in Superior's proceeds as listed above. See the inset for some certified highlights: (see inset)

While I always enjoy viewing and writing about these great rarities, the bulk of the coins crossing the auction block today are well within the reach of collectors. This remains one of the great methods for inspecting large numbers of coins, and selecting the 'best' for adding to your collection.

Notably excepting Mint State Gold, most of the charts were on the 'slightly minus side' of stable. Discounted sells that might have been *less* visible in a week with a nice sprinkling of pluses were *more* visible due to this week's absence of advances. Mint State Gold, while showing many changes, still managed to end balanced, with the declines only *just* outpacing the increases. The biggest disappointments? Buffalo Nickels (simply because the market could have used one of their *stellar* weeks) and Morgan Dollars (which saw many declines).

A word about the Morgans. A dealer once said to me that "If you understand Morgan Dollars, you'll understand the whole market." I thought that comment a little simplistic at the time, but have come to appreciate the amount of truth in it. Of course, there are also times when I think that it is impossible to understand even the Morgan segment. Here you have one of the most popular of all American coins, selling for prices that one dealer described as "ridiculously *reasonable* when compared to their highs of 5 years ago" - a coin that speaks volumes of interesting history and the discounted sells and slipping generics just keep chipping away at the Bid levels. The good news, of course, is that the very popularity of Morgans keeps them trading, and trading activity means that a market consensus of value is at work

CERTIFIED COIN DEALER newsletter

Mint State Type - 5 Years of Pain & Gain
Laggards & Losers May Be Tomorrow's Leaders

Dealers regularly discuss which market segment is *most* important or which segment *best* represents the entire market. Gold Type especially in Mint State is tremendously significant considering the value and numbers of coins. The Morgan Dollar chart is often nominated while prices vary from melt to mega-bucks, the number of collectors *and* coins in the market make these popular coins critically important. Mint State Type is always among the top nominees; representing such a large part of the market, it cannot help but reflect overall trends.

Both dealers and collectors know how the market has performed since 1989, and frankly share their distress. Comparing Bid levels for Mint State Type from June 1989 with today's levels produced a 'painful' Leaders and Laggards chart. With Mint State Type down 38% *on average*, there was no shortage of Laggards. We averaged the PCGS and NGC Bids to produce a list focused on the coins.

The 'top ten' was dominated by the Draped Bust Large Cent; unfortunately, less than three dozen pieces have been certified in these lofty grades, so the gains have not been 'widespread'.

The many MS64 grades among the Laggards suggest a look at how *grades* (again, averaging PCGS & NGC) performed on average. MS61 down 19%, MS62 down 27%, MS63, down 42%, MS64 down 50%, MS65 down 47%, MS66 down 43%, MS67 down 39%. While the pain was widespread the lower grades were more stable (this is also visible in our charts appearing in the first *Bluesheet* of each month). Still slicing and dicing, we looked at how differing levels of value performed over the last five years (using the 1989 Bids for sorting): coins Bid under $100 down 19%, coins Bid between $100-$500 down 26%, coins Bid between $500-$1,000 down 17%, coins Bid between $1,000-$2,500 down 45%, coins Bid between $2,500-$10,000 down 44%, coins Bid above $10,000 down 38%. Again the lower valued pieces held a greater proportion of their value *on average*.

The losses suffered by many who bought *quality coins* at 1989 (or 1988) levels have been staggering, watching a supply/demand market on the way down is not a pretty sight. However yesterday's losses can be tomorrow's gains and coins at current levels look tremendously attractive. *Prospective buyers should note that 50%-90% of the risk has been removed from most Type coins.* That is certainly one reason why trading remains active at these levels.

INVENTORY HIGHLIGHTS

1902 Indian Cent NGC MS-67 (Red) PCGS/NGC Population: 4/13
Imagine the bright red color of a 1994 Lincoln cent. That's what this Indian's surfaces resemble, 92 years after production! **$1,595.00**

1866 Two Cent Piece PCGS MS-66 (Red) PCGS/NGC Population: 5/2
A better date issue at only $100 more that the 1865. This is what we're referring to when we mention some of the great deals in the overlooked areas of today's market. Copper, Nickel, and Silver Mintstate Type are prime areas to research for today's bargain hunters. This Two Cent piece is an example of a coin that will trade for a substantial premium in a stronger market. . .It doesn't have to be strong, just stronger! **$2,950.00**

1859 Three Cent Silver NGC MS-66 PCGS/NGC Population: 2/10
Even color in a blend of beautiful hues. A substantially tougher date, at the price of a common. Why buy common dates in today's market? **$1,695.00**

1868 Shield Nickel PCGS MS-66 PCGS/NGC Population: 6/7
One of the finest examples of this type we've seen. . In fact we wouldn't question this in a MS67 holder! Immaculate, fully brilliant surfaces. **$1,795.00**

1838 No Drapery Half Dime PCGS MS-65 PCGS/NGC Population: 22/30
Lovely gem example from this tough 3-year series. Gentle shadows of aqua and emerald shade the peripheries **$1,895.00**

1911-D Barber Dime PCGS MS-67 PCGS/NGC Population: 2/1
Frosty, white mint lustre atop flawless surfaces For the type collector that refuses to compromise on quality, or price **$3,950.00**

1939-D Full Bands Mercury PCGS MS-69 PCGS/NGC Population: 2/0
The creme de la creme of the type. For the ultimate type set, or the Mercury Aficionado. The absolute best Mercury dime available Of course, this coin has sensational color as well as perfection in strike, condition, and lustre Truly amazing! **$7,950.00**

1862 Seated Quarter PCGS MS-66 PCGS/NGC Population: 4/2
Sea-green and fiery orange highlights lie atop light golden surfaces that are entirely devoid of imperfections. . **$6,495.00**

1907-O Barber Quarter PCGS MS-66 PCGS/NGC Population: 2/2
Stunning rainbow hues outline the periphery and blend gently towards pale blue in the center of the obverse and lavender on the reverse An extremely rare date even in MS65, this example presents excellent value. **$4,850.00**

1926 Peace Dollar NGC MS-66 PCGS/NGC Population: 20/5
Lovely, fully brilliant surfaces with a satiny sheen. Absolutely pristine. **$2,495.00**

Pilgrim (1920) PCGS MS-67 PCGS/NGC Population: 5/1
The most perfectly preserved example of this design we've handled. Besides immaculately clean surfaces, this example radiates heavenly multicolored toning blending lightly towards near brilliant centers. For the superb silver Commemorative collection. **$7,250.00**

San Diego (1935-S) NGC MS-67 PCGS/NGC Population: 7/11
Completely toned in bright pinks, blues, and golds. Undoubtably one of the finest surviving examples of the coin distributed at the California-Pacific Exposition held in San Diego in 1935 ..... **$2,395.00**

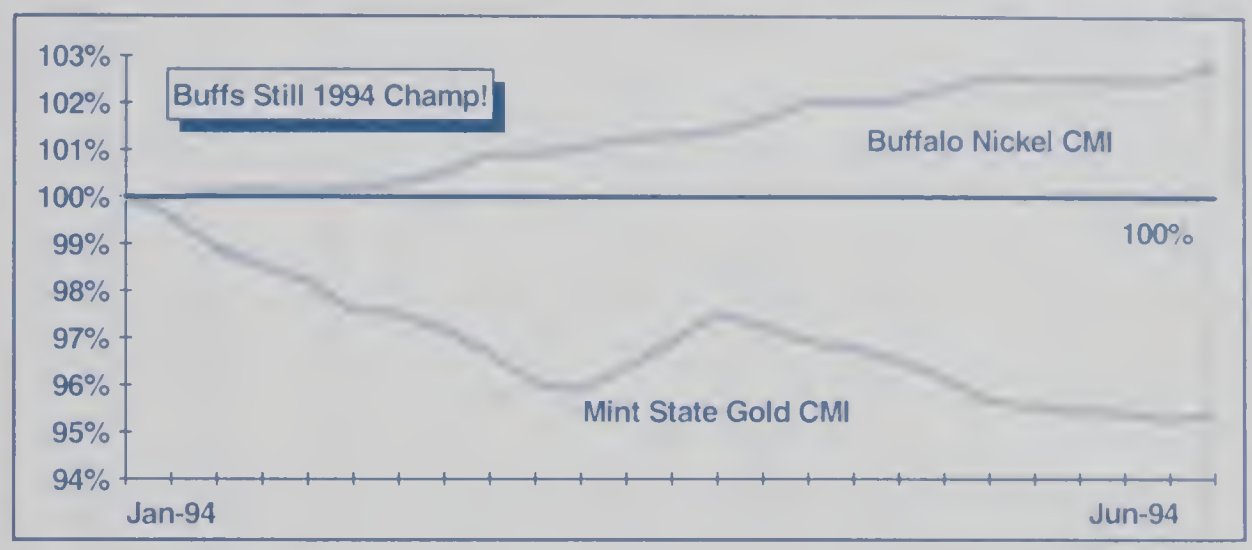
Buffs & Mint Gold Strengthen Market Still Seeking Leadership

Halfway through the year, and what a market! On many of the charts, discounted sells just keep chipping away at Bid levels and dealer confidence levels. Nothing severe, nothing life threatening — let's call it the chronic cough of the coin market. Just that dull, distant echo that periodically reminds you that the market is not as healthy as we would like. But, like taking medicine, we know that the discounts are taking place as dealers are moving merchandise; as long as coins keep trading, we know the patient will survive.



This week's good news comes courtesy of the Buffalo Nickels and Mint State Gold Type. The surge in Buffalo Bids was not unexpected; in this off-again/on-again year, the Buffs had been fairly quiet the previous two weeks. Good old Buffs; you know you can always count on them when the chips are down. Mint State Gold is a different story. They started 1994 with a little weakness, started to recover, and then succumbed to the discounted sells. Because of the size of the Mint State Gold Type market and the number of sells that occur, you can be confident that Bid levels reflect the larger market; when Bid drops in the *Bluesheet*, you can be sure that the Bidders have retreated slightly in the face of discounted selling. We'll see next week if this is the start of another Gold rally, but the prospect is rather titillating. If dealers could get a decent rally out of Gold, the rest of the market might follow.

Before we get too excited about Mint State Gold's prospects it seemed appropriate to compare Buffs and Gold to see how they had fared respectively since the start of the year. Rescaling their CMIs to 100% we expected the Buffs to shine and they did: a 3% rise beats a 5% drop anytime. Fortunately, it wouldn't take much movement in Gold Spot (caused by non-numismatic events) to move the numismatic gold market up quickly. Lately, gold has been climbing in reaction to the Fed.'s ratcheting of the Prime (contrary to expectations and official logic). To help strengthen the Dollar against the climbing Yen, still another increase in the Prime Rate is anticipated; will propping up the Dollar do the job?

ASK LISTINGS

[illegible] Commemoratives are listed Ascending-Size Design within each period. Issues for convenience, Late Ask's of Last Trading Date when dealers are trading premiums, and Date Ranges, and other variations are identified as appropriate. Age Designation and Set Composition are used only as a General guide to aid inexperienced collectors. The Publisher assumes no responsibility for the accuracy of the information presented. Users are encouraged to submit additional information and corrections to the Publisher. Readers should be aware that Quotations are representative of the circumstances when or near which listing does not guarantee that such a price may be available for purchase, or that a price is actually obtainable for a specific coin. Due to the volatile nature of the market, current values may be greater or less than the prices listed. A higher grade coin may command a higher price than a lower grade coin. Refer to the introductory pages of each section for additional information. **Listing Policy** During the thirty days prior to publication of this [illegible] Book Ask on the market place. Last Trade Ask prices are not necessarily the last trade before publication. We do not suggest Ask prices but [illegible] the Ask prices that are [illegible] on the following business days: "w" – Last Ask appearing during the week prior to publication date. "m" – Last Ask [illegible] during the month prior to publication. "lm" – Last Ask appearing last month. "t" – Trade appearing any month of [illegible] than 2 months. "a" – Ask within [illegible] "ot" – Ask [illegible] than 1 month.

WE NEED YOUR RARE COINS

If you have coins to sell, please contact us.

Silvano DiGenova and Stuart Levine of Tangible Investments of America, Inc. and Steven Contursi of S.L. Contursi, Inc. will be merging their respective rare coin enterprises. This remarkable combination of talent will combine to form a major rare coin organization of unprecedented experience, knowledge, talent and integrity.

AMONG THEIR COMBINED ACHIEVEMENTS ARE:

- ✶ Founding member of PCGS, today the largest third party grading service. Also instrumental in assembling the PCGS grading set.
- ✶ Orchestrated the sale of the famous Wayne Miller Silver Dollar collection, which realized over $1 million in 1986.
- ✶ Purchased and sold the Clifford-Kagin Territorial gold collection valued at over $2.9 million in 1988.
- ✶ Major buyers in the famous Garrett, Bareford, Eliasberg, Brand and Carter sales.

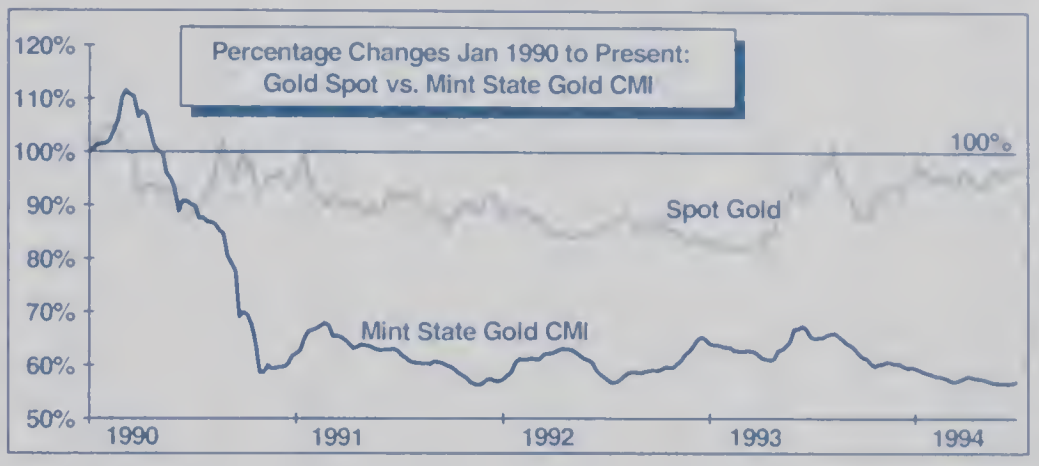
Buffs & Gold Rise Again
Doldrums Nibble at Rest of Market

Summer doldrums. Summer doldrums. Summer doldrums. There now we've said it. We hoped it wouldn't be true, but we learned a long time ago not to bet against tradition. With the rising thermometers this week came a slowdown in activity. Fortunately, Buffalo Nickels and Mint State Gold Type continue to provide us with growing demand. It would be fair to say that these two charts have *dominated* interest, with Mint State Gold accounting for 23% of all plus signs, and Buffalo Nickels **51% of all advances**! Wow, that's one sizzling performance!



Because of the importance of Mint State Gold Type coins to the coin market, and because of the importance of Spot Gold to the Type prices, we probably cannot spend enough time on the subject. A dealer recently asked us to compare the movement in Spot Gold to the movement in our ***CMI*** (see chart). For the purposes of comparison, we used the start of 1990 as 100% and traced the changes since then. Gold Spot was reported in the first ***Greysheet*** of the new decade at $401, which became our baseline for those changes. During 1990 Spot declined as much as 13% (down to $349) but recovered nicely to touch $409 on several occasions. During 1991 and 1992, Spot slid slowly, reaching as low as $333. Spot recovered again during 1993 to $409, and it has been fairly stable during 1994 to its current $386.

The Mint State Gold Type ***CMI*** was started in 1990 and set to 1000, as 100%, this line replicates the usual ***CMI*** chart. For all certified coins 1990 was a disaster with the Mint State Gold Type ***CMI*** plunging to the 593.63 level. Since then, the ***CMI*** has fluctuated within a fairly narrow range (about a 10% spread). The most interesting aspect of the chart concerns the comparisons since Autumn of 1993. From its low of $353, Spot has *climbed* to $386 (up 10%); during the same 9 months, the Gold Type ***CMI*** *declined* from 603.47 to 569.31 (down 6%). Does this *suggest* that a continued recovery in Spot should fuel a recovery in Gold Type and narrow that gap?

CERTIFIED COIN DEALER newsletter

a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. IX No. 27 | July 8, 1994 | Single copy price $4.00

Buffs Soar, Rest Snore
Summer Months Are Time to Score

OK, OK, but it's hard not to get *lyrical* about the Buffalo Nickels. In a market that has quickly embraced the summer doldrums, the Buffs remain the main source of excitement in general, and plus signs in specific. In last week's ***Bluesheet***, we noted "Mint State Gold accounting for 23% of all plus signs, and Buffalo Nickels 51% of all advances!" Well, this week Buffs have outdone themselves, accounting for ***two-thirds of all advances*** on the charts. Granted, it has been a very *quiet* week, but Buffs moving against the background of general lethargy effectively illustrates this market.

Mint State Gold Type was the only other active chart this week, but the news was mixed: 19 advances against 17 declines. This has been the story of Mint State Gold this entire year. Since January of 1994, the Mint State Gold Type charts have seen a total of 664 plus signs (from a low of 3 pluses one quiet week to a high of 68), and 760 total minus signs (from a low of 4 to a high of 48). Over these six months, the more numerous declines have taken a slight toll, as the Gold *CMI* dropped from 594.26 to its current 568.91.

As long as the market remains steady *and* quiet, dealers can hardly wait for the 103rd Anniversary Convention of the American Numismatic Association, being held July 27-31 in Detroit. While there remains some grumbling about the location, dealers are expecting large numbers of collectors anxious to take advantage of the selection at current levels. Low prices and a large bourse are the perfect ingredients for a major shopping expedition. Depending heavily upon their Want List business, dealers are also looking forward to the opportunity to make astute purchases at the auctions and on the bourse. As we have seen at all major shows lately, the combination of purchasing opportunities is a serious draw; the larger the show, the greater the draw. Stable prices have removed much of the urgency to buy", and replaced it with a more steady methodology of searching the floor and pricing the coins. The dealers with the material and the time to chat with the customers may find themselves negotiating more but also making more sales. While we don't always see evidence of the much-touted "service economy" at the local mall, how marvelous that it should become the foundation for selling hard assets".

Beverly Hills Collection Shines Among Heritage's ANA Auction Stars

It *almost* goes without saying: "ANA Conventions mean *great* ANA Auctions". But, we'll say it anyway, because *great* sales like this demand attention and recognition. While the ANA Convention will be back again next year, you can bet that a good many of these coins will not — they will disappear into the great private collections, and may not be seen again this decade (or even in this millennium!). That is the nature of the truly rare coins, especially when *rare* by virtue of high-grade combined with low-population.

Naturally, a sale this large (3500+ lots) contains several very impressive collections, but the most awe-inspiring must be the Beverly Hills Collection of Matte & Roman Finish Proof coins. Only 32 coins in size, this is the first complete set to be offered in a decade. Each of the coins has been certified, and the discerning eye of the purchaser independently verified: 30 of the 32 grade Proof 65 or higher, with half ranking among the finest known. Given time, patience, contacts, funds and expertise, great collections can still be built.

The overall market is looking a little more active this week, courtesy of several dynamic series. Buffalo Nickels are again accounting for more than half of the advances. Walking Liberty Halves are also climbing, with pluses 5-to-1 over declines. Mint State Gold Type was active, but advances only slightly outnumbered the declines. Silver & Gold Commems both show scattered discounted sells, which also hit the Mint State & Proof Type charts. While the vast majority of prices remain steady, the discounted sells continue to give the market a taste of weakness.

ANA Convention Nears
Demand Continues Selective

Heritage's 1994 American Numismatic Association Sale catalogue continues to draw rave reviews from the numismatic community. Overall market activity continues at an even pace, but both dealers and collectors seem pumped up over this 3500+ lot event. Last week's ***Bluesheet*** listed all 32 coins in the amazing Beverly Hills Collection of Matte & Roman Finish Proof coins. Heritage's sale includes several other prominent collections, including the estate of David Faraday and the Tyler Dillon of Wellesley Collection. Among the highlights of the Faraday Collection are his exquisite grouping of patterns and superb quality Type coins (including the astonishing 1834 Classic Head Half Eagle in PCGS66). The Dillon Collection is also characterized by a devotion to quality coins, especially in the Silver Commemorative series. Included are such wonder coins as a Lafayette Dollar in MS66, an Alabama 2x2 in MS66, a Grant in MS67, a Lincoln in MS67 and a Vancouver in MS67.

Activity continues light this week, with most issues remaining steady. Silver Commemoratives are lower on a sprinkling of discounted sells, as are the Gold Commems. Both Morgan and Peace Dollars were steady, but likewise are the scene of scattered discounts. Bids in Mint State Type were virtually unchanged, while Mint State Gold Type continued its recent gyrations - declines outnumbered advances two-to-one this week. Proof Type and Proof Gold Type remain steady.

The real excitement this week comes from the specialty series, with Buffalo Nickels, Mercury Dimes, and Walking Liberty Halves together accounting for about 80% of this week's plus signs. The Buffalo Nickels advanced **solidly**, with the increases mainly in the NGC63 & 64 columns. On several occasions over the past year, we have pointed charts in the editorials showing the 'on-again off-again' pattern of Buff plus signs. It has now been another five weeks of steady advances and the Buff *CMI* is climbing assertively. The Mercury Dimes and Walkers both showed a substantial number of advances, and a lesser number of declines. In the case of the Mercury Dimes, the advances were concentrated in the MS66 Full Bands, while the declines were scattered. The Walker advances were in the earlier dates.

Just a few of the many additional highlights:	
1796 Bust Dime, Sm. Eagle	NGC66
1805 Bust Dime	NGC65
1841 W/Drap. Dime	PCGS Pr62
1860 S Seated Dime	PCGS65
1825 Bust 25¢	PCGS66
1901-S Barber 25¢	PCGS65
1854 Arrows 50¢	PCGS Pr65
1794 Bust Dollar	PCGS35
1794 Bust Dollar	ANACS40
1854 Seated Dollar	PCGS Pr65
1862 Seated Dollar	PCGS65
1889-CC Morgan $1	NGC64 DPL
1863 $2.5	PCGS Pr64
1876 $5	PCGS65
1878-S $10	PCGS50
1888 $20	PCGS Pr64
1910 4 Pc "Roman Gold" Pr. Set	PCGS Pr64

The ANA Convention is such an enormous affair with so many dealers on the bourse and so many quality coins in the auction, you can be sure that buyers seeking any specialty will find more than enough coins to satisfy their budget. That is one of the main reasons for the continued success of this summer event.

ASK LISTINGS

ASK columns reflect the lowest dealer asking price based on numerous Coin Advertising Trade Group wholesale trading services and the coin dealer price guide sources of all denominations. An unscrupulous dealer may offer to sell coins at prices far below those listed. The following abbreviations are used for the grades of uncirculated coins: MS-60 (Mint State-60) = Choice Uncirculated; MS-63 = Select Uncirculated; MS-65 = Gem Uncirculated. Proof coins are graded on a scale of 60 to 70. Proof-60 = Choice Proof; Proof-63 = Select Proof; Proof-65 = Gem Proof. Proof coins are usually sold in sets. Proof coins are not available in all denominations in the coin series you are collecting. Listing does not guarantee that the grade is now available for purchase or that a reputable dealer is willing to buy coins at the prices listed. Due to the variable nature of the market, prices may be greater or less than those listed. A higher grade coin usually brings a higher price than a lower grade coin. Coins with identical grades may sell for different prices because of differences in eye appeal. **Listing Policy.** During the years designated for publication, we mail questionnaires to dealers requesting current bid and ask prices for coins in their specialty. Only coins for which we receive a sufficient number of responses are listed. We do not list coins for which we receive only one response. We do not list coins for which we receive no response. Coins listed in the current edition but not listed in the next edition are coins for which we received insufficient responses. Coins not listed in the current edition but listed in the next edition are coins for which we received sufficient responses. Coins not listed in either edition are coins for which we received insufficient responses. Coins not listed in either edition are coins for which we received insufficient responses. We Finance

Spectrum is pleased to announce the sale, of the famous George Bodway set of Morgan Dollars to Jack Lee. Spectrum acted as the agent for both parties to bring these two great sets of Morgan Dollars together, forming the Jack Lee Collection. The sale of the Bodway set was well in the 7 figure range and contained many of the highest graded Morgan Dollars, as well as many of the PCGS tour coins. The resulting set is undoubtably the highest graded set of Morgan Dollars in the world and may never be equalled. Spectrum will be involved in later publicity of this Dollar Set with prospects for the set to be displayed in the near future.

Buffs Thunder Into Detroit Wholesale Levels Steady At ANA

Buffalo Nickels continue to hog the limelight, and dealers are expecting them to be crowned 'Miss Popularity' of the ANA Convention in Detroit. Well, considering Obverse & Reverse, maybe 'Mr. Popularity' would be more appropriate. Looking at the market as a whole, the Buffaloes have provided us with a disproportionate percentage of the thrills this year. Since January of 1994, Buffalo Nickels have accounted for ***more than a quarter*** of ***all*** the plus signs printed in the ***Bluesheet***! Disproportionate perhaps, but welcome never-the-less!

To view that achievement in its proper perspective, let's compare the Buffalo charts to the *next* largest generator of plus signs, the Morgan Dollars. The Buffalo Nickel chart lists 68 issues in five grades, for a total of 680 prices every week; the Morgan Dollar chart lists 104 issues in 10 grades, for a total of 2080 prices every week — more than three times as many Bids. Yet, since January, the Morgan Dollar chart has produced only 1150 plus signs to the Buffalo's 1816 advances! Need to be impressed further? Since January, the Buffalo chart has included only 231 declines, compared to the 2,120 minus signs that could be found on the Morgans! Is there any wonder that the Buffalo Nickel ***CMI*** has climbed from 754.79 to 806.71 since January, while discounted sells have 'nibbled' the Morgan ***CMI*** from 754.20 down to its current 734.03.

Need to be impressed even further? Since January, only two ***CMI***s have increased: Buffalo Nickels & Walking Liberty Halves. Walkers, at their current 754.84 ***CMI***, are up over January's 747.91, but in early Spring they dipped as low as 741.39. So far in 1994, *only* the Buffalo Nickels have demonstrated the ability to sustain a rally. The only bad news about Buffs? As one dealer put it, "You cannot run a market rally on Buffalo Nickels!" True enough, but every rally has to start somewhere; maybe Gold will 'get on board' one of these days. If the other charts continue their slow slide, Buffaloes won't be able to turn this market around all by themselves.

First reports from Detroit are calling the show "active" PNG day, the traditional opening 'event' of the convention, saw dealers scurrying to fill their Want List needs. Dealers remain *quiet* about their Want List activity, but these seem to be of growing importance in this stable market. Dealer concern about *not* broadcasting their demand seems to have taken precedence over a quick filling of the Want List. This certainly makes sense at a major show, where quiet inspection of seller's inventories can produce better prices than when demand is well-known.

WE NEED YOUR RARE COINS

If you have coins to sell, please contact us.

Silvano DiGenova and Stuart Levine of Tangible Investments of America, Inc. and Steven Contursi of S.L. Contursi, Inc. will be merging their respective rare coin enterprises. This remarkable combination of talent will combine to form a major rare coin organization of unprecedented experience, knowledge, talent and integrity.

AMONG THEIR COMBINED ACHIEVEMENTS ARE:

- ✯ Founding member of PCGS, today the largest third party grading service. Also instrumental in assembling the PCGS grading set.
- ✯ Orchestrated the sale of the famous Wayne Miller Silver Dollar collection, which realized over $1 million in 1986.
- ✯ Purchased and sold the Clifford-Kagin Territorial gold collection valued at over $2.9 million in 1988.
- ✯ Major buyers in the famous Garrett, Bareford, Eliasberg, Brand and Carter sales.
- ✯ As Senior Vice President, Steve Contursi guided the growth of Blanchard and Company, Inc. from a $1/2 million in U.S. numismatic sales to over $4 million in sales per month.
- ✯ Key buyer in the Norweb collection auctions, purchasing in excess of 10% of the entire collection.
- ✯ Number one purchasers in the:
  - James A. Stack sale
  - Trompeter Gold sale
  - Floyd Starr sale
  - Stack's 55th Anniversary sale
  - these and many, many more sales.
- ✯ Purchased the last part of the fabled Lavrene Redfield hoard.

Together these unique partners have purchased in excess of $1/2 billion in U.S. rare coins. Now they combine their numismatic expertise, overall integrity and financial stability. Our multi-million dollar inventory will speak for itself. This partnership combines over fifty years of numismatic experience. Call today and see what a difference it is to deal with a real Rare Coin firm.

Beverly Hills Collection Sets Current Market Prices
Heritage Hosts $8.4 Million ANA Auction

Well, ANA Conventions do deserve *great* ANA Auctions, and Heritage Numismatic Auctions has turned in a spectacular performance with Prices Realized of $8.4 million reported. While this large sale (3500+ lots) indeed meant 'something for everybody', the attention of gold specialists was riveted to the awesome Beverly Hills Collection of Matte & Roman Finish Proof coins. This was the first complete set to be offered at public sale in a decade, and 30 of the 32 coins had been certified as Proof 65 or higher; fully half ranked among the finest known. Presenting this complete set to the world's largest gathering of numismatists provided the opportunity to establish today's market prices for these seldom seen beauties.

Activity on the ANA bourse was steady, with dealers reporting mixed results. While some dealers deemed the show "OK" only, many others were more enthusiastic, and a few were ecstatic. Success in this market requires just the right combination of customers, material, pricing and effort. Dealers who relied too heavily on the "Bread & Butter" coins (the coins that every other dealer stocks and that normally account for a good part of sales) faced a slowly market lacking inspiration. Perhaps here the problem is the enormity of the bourse. When a buyer has a choice of ten or twenty (or more) *equivalent* examples there is no rush to buy, and certainly no reason not to buy the cheapest *nice* coin. Dealers stocking the lower value collector coins and the high ticket rarities and esoteric items reported a very strong show.

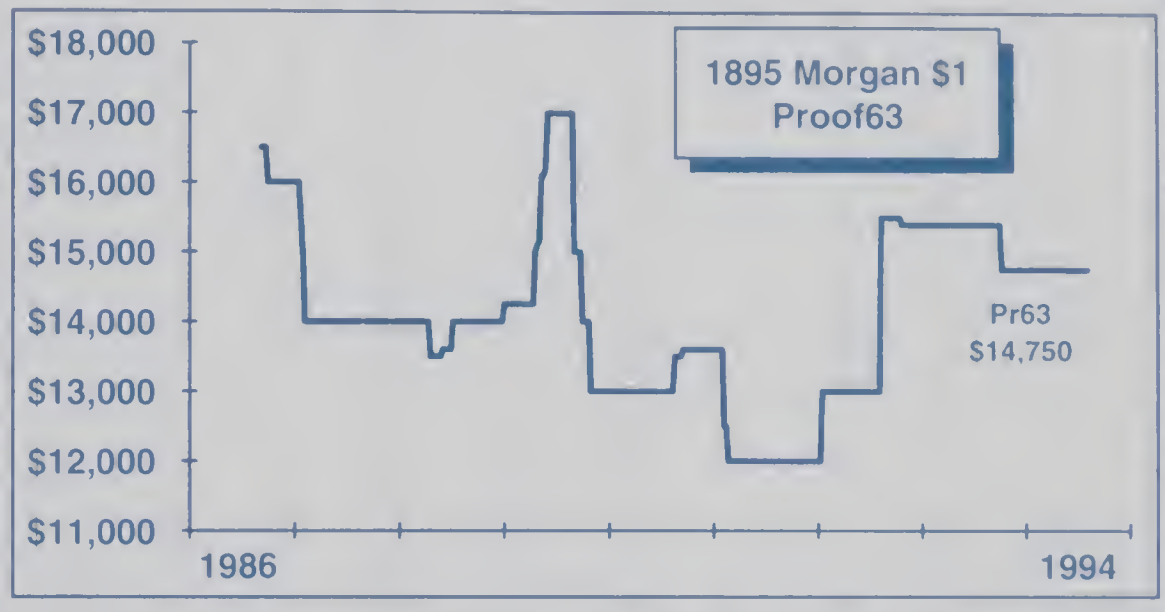
A Time to Buy Rarities?
There are Rarities and *Rarities*

There are certain coins that are relatively well-known by the public: the 1909-S V D B , the 1804 $1; the Brasher Doubloon; the 1913 Liberty 5¢ the MCMVII High Relief, and the 1895 Proof Morgan. Some become 'famous' from 'penny' boards, others from dealer ads or the movies Certainly, beginning collectors quickly become aware of these coins and they are soon filled with their mystique. Some of these *great* coins must remain only the stuff of dreams.

But there are also "great" coins that are affordable. An S-VDB, even in Gem condition, is well affordable to collectors; they can *own* this fabulous piece of numismatic history. The High Relief is genuinely rare, yet exists in sufficient quantities in Mint State to make owning one a realistic goal for those in the appropriate income bracket. The 1895 Proof Morgan is different. There are other series with Proof-only dates, but none approach the mystique of this coin; a friend once described the 1895 as "a coin with *mana*." It may be seen only in the mind, but this coin radiates a *glow* about it. There is simply something special about it, something special that has grown out of the demands and desires of a century of collectors, and that gets passed down to every new generation of numismatists. Anyone who has ever *started* a date set of Morgan Dollars (and who hasn't?) has dreamed of this coin.



With such popularity why didn t it go ballistic during the '80 boom? Its Bid history is actually quite reasonable, the spread between its $17,000 high and its $12,000 low is actually quite "stable" compared to most rarities. Its continued popularity accounts for the mild decline but how to explain the limited increase? Did the Population Reports show it to be one of those "*common* Rare" coins? The current combined PCGS/NGC counts show 55 pieces certified in Proof 63 (this is *rare*) and a *bargain* at $14,750) compared to the High Relief with 618 pieces in MS63 and still building at $7,800. Why the disparity or to be more succinct why is the 1895 so *low* and the High Relief so *high*?

One clue comes from the choice of the $20 for the comparison. The High Relief is the quintessential *Type* coin. It must be in every 20th Century Type set, in every Gold Type set. It is beautiful almost beyond description, and if you want the design Type in High Relief, this is your *only* opportunity. And while *rare*, it is certainly *obtainable*. While the popularity of the 1895 Morgan endures, it *must* be purchased *only* by the collector completing his Morgan date set - and there just aren't as many of those around today. As a Type coin, the 1895 in Proof63 is gorgeous, but it has to compete with more than 1,300 *other* Pr63 Morgans that have been certified.

PROOFLIKE MORGAN DOLLARS

PL Dollars may be considered the entry-level "proof" coins. Some collectors prefer Prooflikes. Both the PL and DMPL grades have their own premium over non-PL coins.

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1994 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list averaging 5,000+ current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only $325 - well below the mailing industry standard of $75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than $425 over First Class postage rates!). Need just one state or region? Need a trial sample? Want to take advantage of our discounts for multiple mailings? Want us to handle your mailing for you? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 1994 Numismatic Dealer Directory. I understand that my $325 fee entitles me to only one usage of these names. _____signature

WALKING LIBERTY HALVES

If your coin will stand on its own merits regardless of the certified grade, a higher *CDN* Bid may be more indicative of current market value.

Mint State Gold Active Eagles Advancing Impressively

Mint State Gold Type, one of the critical areas in the coin market, has been unable to deliver a sustained rally for longer than we care to remember. Some of this can be 'blamed' on Gold Spot, which has not been very healthy. Spot started the year at $394 and has cycled down to its current $378 level; that certainly accounts for many of the declines on the lower-grade circulated gold. Since January, the ***CMI*** for Mint State Gold Type has slipped from 594.26 to this week's 567.31; along the way, the ***CMI*** has traced some small cycles, going (in order) down, up, down, up, down, and over the last two weeks, up again. Given the background of the movements in Spot, that should be expected (although the movements are not always as closely aligned as a direct cause-effect relationship would indicate). Numismatic demand seems to be steady against the sliding Spot, with a few notable Types producing excellent profits: (see chart)

$10 Liberty, No Motto (1838~1866)	PCGS MS61	$2,300	$2,520	up 10%
$2.50 Indian (1908~1929)	NGC MS62	$280	$306	up 9%

Eagles, especially in MS61 & MS62 have been showing splendid strength since January, and especially during the last few weeks. The $10 Indians from both PCGS & NGC have been leading the pack, with the MS62s slightly outperforming the MS61s. The $10 Liberty Types have also seen increased demand. The rarer No-Motto $10 has shown that 'bigger-ticket' coins are capable of turning a profit, as well as the With-Motto $10 in MS62 and MS61. Now, a 10% gain over 7 months is a far cry from the 'good old days', when we saw that kind of volatility on a weekly or monthly basis, but today's market can only benefit from stability underlying sustained growth.

The Quarter Eagle Types have also been climbing under increased demand, and also in the lesser uncirculated grades. The $5 Liberty With-Motto Type almost completes the sweep, up 15% since January. Dealers are beginning to wonder if the $20 Types are poised to follow this next rally. A 20% increase on the $20s could produce some much-desired enthusiasm and optimism. Since January, the Type-3 Double Eagles have turned in a mixed performance, up in MS61, MS62 & MS64, down in MS63, MS65, & MS66, and unchanged in MS67. The Saints were up in MS61 & MS62, and down elsewhere. Selective demand, to be sure!

A chart hit even harder has been Franklin Half Dollars. Franklin is a favorite figure from American history, and this is one of the series that beginners can complete without a major investment. All of our ***CMI***s started 1990 at 1000, at its current 507.32. Franklins are bidding about half of their 1990 level. This is attracting the attention of many contrarians looking for a popular series selling at a steep discount. An attractive set in MS64 Bids at only $643, in MS65, $3,834 would be required; but in MS67, only the ultimate specialist will be found pursuing a set topping $73,000!

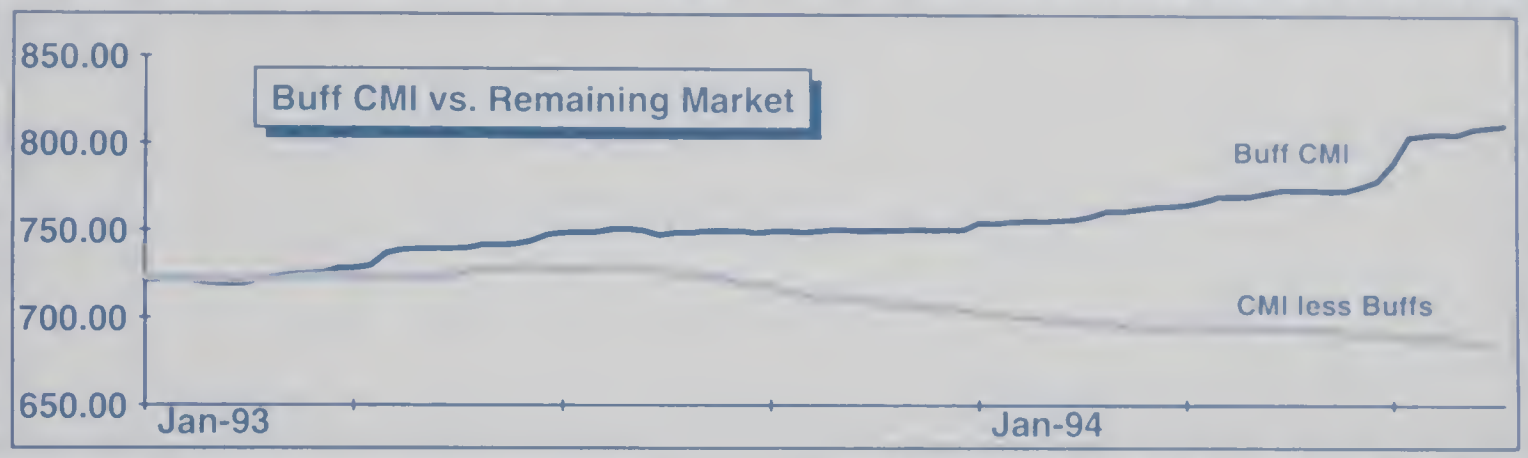
Buffaloes Climb Again
If Only Other Series Were As Active

I'll give you the bad news first: the Buffalo Nickel *CMI* is up another 1.03 points this week. *Bad news?* Only indirectly: perhaps it makes more sense if I quote another statistic: Buffalo Nickels account for just under one-third of all plus signs this week. That is more to the point. Buffalo Nickels are great coins, and I am thrilled to see them prosper under a truly sustained rally. The "bad news" really has nothing to do with Buffaloes - it's just that they are providing the *only* consistently positive movement in the marketplace. The rest of the charts are rather lackadaisical, and the "good news" comes only sporadically.



One dealer, who has been profiting handsomely with the Buffs, recently asked how much of the overall market *CMI* could be attributed to the Buffaloes. That is actually two separate questions. At the time that we started the *CMI*, we decided to weight each of the charts equally; that is, the overall *CMI* is a simple average of each of the 19 individual chart *CMI*s. That is not to say that we believe that PL Morgans (to take an example) are as important as Mint State Gold Type - we don't. The problem is the impossibility of weighting the charts according to market *importance* - that way madness and arguments lie. Since the *CMI*s value lies in its usefulness as a general market indicator, a simple averaging system works fine, and the Buffs are 11.08% of the overall CMI.

The more interesting answer, of course, is to be found by backing the Buff *CMI* out of the overall *CMI*, and then we find that the strength of the Buffaloes accounts for the overall *CMI* being 6+ points higher than it would be otherwise. The charts follow the *CMI* figures for Buffs since January 1993 when the Buffs were actually slightly lower than the overall *CMI*. Since then, the Buff *CMI* has climbed 89.31 points, the overall *CMI* has declined more than 30 points.

Frankly, I was surprised that the overall *CMI* number only dropped 6-7 points when the Buffaloes were removed - that reflects the ponderous nature of any average made up from a large series, and how difficult it can be to move that average substantially, either up or down. We would be only too glad to see rallies in several other charts make the effort, though. And while the overall CMI is basically stable, we would rather be reporting a 30-point increase since January 1993. We like that kind of "stable" much better!

Mint State Gold Type Shows Signs of Life
Buffalo CMI Advances 2.14

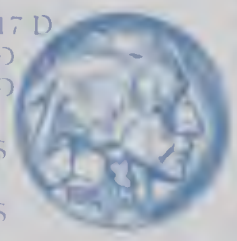
Even this steady almost lackadaisical market has its own excitements. First there is the uncertainty of which hundred issues will suffer minus signs as a result of small discounted sells. Then there is the numismatist's favorite standby wondering if gold spot movements will ever make sense. And since January of 1993 we have added one more pastime - wondering if the Buffalo Nickels will go up again or only gather strength this week. Well, one out of three ain't bad!

We have devoted quite a bit of *Bluesheet* editorial space to the Buffaloes lately, but they deserve it. No other chart has produced such steady growth since January of 1993; would that Mint State Gold Type had appreciated in this fashion instead of its sporadic flutters. No other chart has enjoyed such expanding demand. In last week's issue, we graphed the Buff ***CMI*** versus the remaining market, and in the July 29th *Bluesheet* versus the Walking Liberty Half ***CMI***. Other charts have compared the Buffs to Mint State Gold Type. But whether tracking averages, plus signs, or the ***CMI*** figures the answer comes back the same: we have been enjoying a wonderful Buffalo rally.

This week the Buff ***CMI*** advanced another 2.14 points; despite that advance, the overall market ***CMI*** was down .37. Even the mighty Buffs cannot sustain enough momentum to carry the entire market. Most of the Buff advances since January 1993 have come in the MS63 through MS65 columns; the MS63s have averaged an 18% increase; the MS64s averaged a 20% increase; and the MS65s averaged a 28% increase.

Ultimately, though, profits or losses are made on the buying and selling of individual coins, and I thought to take that perspective this week. Since January of 1993, 60% of the issues covered in the *Bluesheet* have advanced; another 26% were steady, and only 14% declined. Among the leading individual Buff issues over the past 20 months were the following:

Leading Buffaloes	Grade	1-1-93 Bid	9/0-94 Bid	% increase
1936	PCGS65	$56	$85	up 51.8%
1929-S	PCGS65	$190	$320	up 68%
1929-S	NGC65	$180	$300	up 66.7%
1918	PCGS65	$60	$120	up 100%
1918/17 D	PCGS65	$40,000	$60,000	up 50%
1935-D	PCGS66	$925	$1,750	up 89%
1928-D	PCGS65	$425	$650	up 52.9%
1927	PCGS67	$85	$160	up 88%
1929-S	NGC64	$70	$130	up 86%
1928	NGC63	$26	$48	up 85%
1930-S	PCGS65	$230	$415	up 80%
1929	PCGS65	$130	$240	up 77%
1918	NGC63	$60	$106	up 77%



Consider just the MS67 coins. Despite the average 25% gain and despite the spectacular individual gains noted above, there are still some MS67s which have shown *no* movement over the last 20 months. Eight to be precise: 1909 in PCGS63, 1913-D Type 1 in NGC63, 1915-S in NGC63, 1920-D in NGC63, 1920-S in NGC63, 1925-S in NGC63, 1930 in NGC63, and 1935-S in NGC63. Since we are not in the predicting business, we won't make any promises about the potential for these coins; the real contrarians might prefer to look at the small number of MS65s which have declined during the same period. Other investors will look at the issues with the biggest spread between the PCGS and NGC prices. Some will even buy the Buffaloes because they are beautiful coins with a fine American theme, and worthy of collecting. We do note, however, one curiosity: just like the leading issues, the steadies come in all price ranges, from $70 to $16,000. We shall see.

CERTIFIED COIN DEALER newsletter

a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. IX No. 36 | September 9, 1994 | Single copy price $4.00

Certified Gold to Be Hammered Down Sept. Auctions = Buying Opportunities

Collectors of Certified U.S. Gold especially the rarer dates and higher grades, will discover that September is bringing them riches far beyond the reach of nearly all checkbooks. Collectors can choose from three upcoming auctions, all with fine offerings of U.S. Gold. Heritage Numismatic Auctions will be hosting one of the popular Bullet Sales the evening of Sept. 9, in conjunction with the 1994 East Coast Expo (Sept. 9-11) being held in the Meadowlands of NJ. Bowers and Merena's *Richard & Jean Salisbury and Ted K. Woods* sale will be held in NYC on Sept. 12-14, and Stack's sale of United States Coins on Sept. 21-22. Included in the Stack's sale is a complete set of $3 gold (uncertified), as well as specialty collections of 'raw' Gold from Charlotte, Dahlonega, and Carson City; it will be interesting to see how many of these lovely coins end up 'in plastic' within the month!

There are a handful (or two) of coins that serve as a bellwether to the market. While different dealers will naturally have their own ideas about these key issues, most will include the 1881-S Morgan Dollar as an excellent indicator of the Morgan market and with much reflection on the entire market. The 1881-S in MS65 the ubiquitous Type coin has been quite steady over the last 16 weeks, but going back as far as two years, the MS65 has been trading in a fairly narrow range. Since September of 1992, the MS65 has averaged a Bid of $87, with a high of $112 and a low of $77. 58 of those weeks were spent in the $80-$90 range. A steady Morgan market will encourage new collectors, and should be one of the foundations for future market growth.

PROOFLIKE MORGAN DOLLARS

PL Dollars may be sent to certification service to be graded, and then returned to the customer. Proof-like holder for PL coins usually much more than for DMPL. Top certified coins are rare, even on non-PL strikes.

CERTIFIED COIN DEALER newsletter

a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. IX No. 37 | September 16, 1994 | Single copy price $4.00

Activity Encouraged by Steady Market
Trickle of Minus Signs Masks Market Strength

From all reports collectors from the Mid-Atlantic States (and their dealers) have been having a "field day". Actually with all the numismatic events taking place, maybe that should be a 'field fortnight'. The 1994 East Coast Expo, held Sept. 9-11 in the Meadowlands, reported strong attendance. In addition to a "sold out" bourse, many additional dealers attended to work the floor; in short, there was no shortage of coins to be examined, bought and sold. Those dealers reporting the most active show were those catering to the retail trade, but we are pleased to report that wholesalers willing to sell "larger deals at the right price" were also able to move material. The success of the Expo has encouraged the organizers to plan two conventions in 1995.

Heritage Numismatic Auctions hosted one of their popular certified Bullet Sales at the Expo, and reported healthy collector bidding. While the inset box lists some of the auction highlights, we will take note of another significant reason for the continuing success of these sales. Among the lots hammered down in this Bullet could be found several dozen selling for under $100, more than 100 lots selling for under $250, and an average lot value around $600. Simply stated, Heritage's Bullet sales permit *every* collecter at whatever means to participate in a significant numismatic event. When bringing new collectors into the hobby is so important, Heritage has found a satisfactory method for selling individual lower valued coins without lumping them into combo lots.

As we go to press Auctions by Bowers and Merena is just concluding their *Richard A. Jean Salisbury and Ted K. Woods* sale held in New York City on Sept. 12-14. The Bowers & Merena catalogues are always a treat to read, a numismatic education awaits the reader, and a numismatic treasure awaits the purchaser. Patterns proved to be especially popular at the auction, with an 1875 20¢ J-1394 in PCGS Pr66RB realizing $6,875, and an 1870 $1 J-1020 in PCGS Pr66RB bringing $12,100.

While coins are trading actively, the 'news' on the Bidding front is no news at all, under the pressures of discounting, a handful of Bids slip on every chart. Nothing catastrophic, nothing severe; just enough to turn a steady market into one drifting ever so-slowly. This week, only the Mint State Gold chart succeeded in posting more plus signs than minus, yet the overall market is showing definite signs of strengthening at current levels.

Buffs Do It Again!
99 Plus Signs : 1 Decline

Thank goodness for the continuing good news. Buffalo Nickels which have been the mainstay of the market for more than a year now have turned in yet another spectacular week. Demand continues to be widespread, encouraging dealers to believe that the 'boom' will not soon turn 'bust'. With 99 plus signs (against one solitary decline), there is no escaping that the Buffs are "hot". Since last January, only two *Bluesheet* charts (Buffs & Walkers) have enjoyed a positive movement in their ***CMI***, and only with the Buffs has the movement been substantial. When the chips are down, Buffs have proven to be a real winner.

The Buffs were joined this week by advances in the Mint State Gold Type chart. In many ways, the 43 advances:9 declines in Gold Type are more important to overall market health than the runaway Buffs. In several recent issues, we have looked at the relative importance of Mint State Gold Type. As one dealer succinctly phrased the importance of Gold Type to a healthy market: "If you ain't got gold, you ain't got nothing." A bit of an overstatement, perhaps, but underlying logic that's hard to argue. The Buffalo advances are making money for some, and buoying the hopes of many more, but a sustained rally in Gold would drive an advance of the entire market.

Not to dwell on less pleasant 'news' in the market, but the trend of "just South of steady" continues. Market levels are largely steady, and trading is taking place at current levels; however, there are dealers willing to sell coins at a slight discount to Bid (in order to make a quick sale), with the net effect of a *very* nominal decline. Since January, the ***CMI*** has dropped from 706.18 to 689.01; this is a slight decline, to be sure, but indicative of the cumulative effect of discounting. The inset chart tracks the cumulative number of plus signs and minus signs since January. Here too the discounts are staying ahead of the advances and preventing any real sense of enthusiasm or growth from developing. The importance of the Buffalo advances to overall market advances is also readily apparent.

Sharp-eyed readers will notice a very subtle change starting with this week's *Bluesheet*. Since we began issuing the "*ASKSHEET*" as a supplement in the fourth *Bluesheet* of the month, we have kept the nomenclature "Ask" at the top of each of the columns. That name, while conveying the *sense* of the information was not *entirely* appropriate and we have replaced it with the more accurate "Market". We would refer all readers to the explanatory paragraph at the top of Page 2a. The Market columns contain the last/latest sell-based information that we have seen in the marketplace; certainly, much of this information comes from Asks, but Trades, Selling Advertisements, Coin Shows, and Auctions are also important sources. The coding allows numismatists to identify the source and timing of current information for their own evaluation processes.

Mint State Gold Strengthens Another Opportunity for Long Beach?

U S Gold is hotter than a firecracker and is fueling growing anticipation for the Long Beach Coin Show. If your Mint State Gold is below MS65 has no spots and no nicks on the rims, you can probably get as much as 10% over current sight-unseen levels. Remember, the premium comes when you have one of the pieces currently enjoying demand in the 'brave old world' of sight-seen bidding. You will need to search for the *highest* Bidders, but they will make themselves known on the bourse soon enough - just look for the lines forming. A buyer who wants clean, unspotted coins (and is willing to pay a little more for the privilege) can generate some real excitement in this market.

So, what happened on the gold front between the ANA convention and Long Beach? Can two months and a few buyers really make that much of a difference? Will the "Long Beach *curse*" bring Gold Spot off its recent highs? What a market! We have dealers who think that 'we've seen it all before' arguing with those who think 'we've never seen anything like this before'. It is fair to just say this about Gold (and specifically about Gold Spot): Over the last several years, wars have come and gone, and gold yawned; international tensions reached crisis proportions, and gold hardly flickered; budgetary crises threatened, and gold held steady; but Long Beach week looms, and gold becomes volatile. All right, I'm not being entirely fair. Gold Spot has been rising for some weeks now, and continues to test its 1994 high. Over the same eight weeks of the chart (between ANA and Long Beach), Spot dropped from $383 to $377 before rising to the $390 level. However, we approached $400 gold earlier this year without seeing that much movement in the numismatic coins.

Over those same two months, we're most interested in what's been happening to numismatic gold. As the **CMI** chart indicates, we have been enjoying some healthy increases - and I mean *healthy* in terms of an active, moving, adjusting market. Between ANA and the Long Beach Coin Show, as the **CMI** rose from 563.05 to 572.54, we saw 303 Plus signs and 142 declines on the Mint State Gold Type chart. This is an excellent balance for a slowly rising market. The CMI increases have been coming below the MS65 level, the Gems still are showing some slight weakness from discounted trades chipping away at steady levels.

A market rise begins when some dealer has to step up and pay a little more to secure the coins needed to fill the demands of his customers. If enough buyers are demanding enough coins of them dealers, the market will rise. If that rise continues over time, increasing numbers of dealers will participate as their customers want to get in on the market rally. Sounds simple, doesn't it? Yet, there is no denying the positive movements that can be generated by just a few dealers. We are seeing this recently in Mint State Gold, and for the entire year in Buffalo Nickels. Imagine if all 5,000-plus dealers listed in our Numismatic Dealer Directory were working to generate the demand that produces these much needed advances.

Buffs & Gold Driving Market
Long Beach Trading Fest Arrives

No doubt about it; Mint State Gold Type and Buffalo Nickels are the market drivers. The market has been watching the steady climb of Buffalo Nickels for more than a year, and while it is pleasing to see any series advance (especially *consistently*) I have commented on several occasions that you cannot base a whole-market rally on the Buffalo Series. Fair enough; no one ever claimed that you could. Over the past year Mint State Gold Type coins have been more sporadic in their advances, but more important to sparking a rally because of their crucial role in the coin business. A handful of dealers commit to Buffalo Nickels, and sellers are quick to notice; but let some serious buyers commit large sums to Mint State Gold Type, and the entire market goes 'on alert'!

This week, the Buffalo Nickel chart produced an impressive 115 plus signs to only 3 declines. Over the past 52 weeks, the Buffalo Nickel ***CMI*** has climbed from 749.78 to 825.92. This 76-point climb is the tops among the weekly charts. Mint State Gold Type produced 68 advances this week, against only 2 declines. The Gold ***CMI*** has ***been*** much less impressive, only now approaching the levels of January, and still down from a year ago. In the Mint State Gold Type market, however, this volatility has come to be expected. In the ten weeks before the Summer ANA, the Gold ***CMI*** hovered between 569.37 & 563.05; since the ANA, the ***CMI*** has risen from 563.05 to 580.09, a solid 17 point rise. It doesn't so much matter where the ***CMI*** stood a year ago; what is more important is where demand levels stand *now*, and how the latest mini-rally is progressing.

As noted last week, the advances are building on Mint State Gold graded below MS65, with no spots or rim nicks; such attractive coins are bringing as much as 10% over sight unseen levels. In the sight-seen atmosphere of the bourse this will mean matching the right coin with the right buyer so expect to see a lot of foot traffic in the aisles. The new Long Beach Coin Show facility will get quite a workout in its first appearance. The chart indicates those coins with the greatest percentage increase since ANA; this should bring a welcome profit opportunity for many dealers.

CERTIFIED COIN DEALER newsletter

Market Strengthening at Current Levels
Heritage Auctions Top $4 Million

Last week's Long Beach Coin Show has passed into numismatic history, and many dealers reported a very positive show. Most of the negative comments regarded the new facility, which could be called cavernous; dealers were simply having trouble locating each other. By the next Long Beach, all will have gotten used to the new arrangement. Floor traffic was steady, although here too the larger facility made the crowds look, well, less crowded. As the spaces get filled over time with other dealers and other collectibles, even more collectors will be exposed to the numismatic treasures that such a major show provides.

Heritage Numismatic Auctions conducted two separate auctions in conjunction with Long Beach. Their Signature sale ("The 1994 Long Beach Sale") realized $3,132,560, and the catalogue contained the *usual* broad array of numismatic items (including many certified coins). Heritage's certified-only Bullet sale ("The October Long Beach Bullet Sale") realized an additional $890,946, bringing the total above the $4-million mark. While both sales presented an enticing array of coins of all price levels, many high-powered coins traded hands. Among the certified highlights realizing 5-figures: (see insets)

The strength of gold coins manifested itself at both of the auctions and on the bourse. Better-date, truly rare gold coins seem to attract significant interest. Quality coins in all grades were much in demand, especially below MS65 in grade. The Gems were avidly sought after, but few were available at 'bargain prices'. This seems to be true of the overall market at this point. While there was certainly no shortage of coins on the bourse, many dealers continue to hold their best quality coins off of the market. In a depressed market, it makes some sense to hold the "wonder coins" until the next breakout. The Gems that were available, often commanded high ticket prices and sellers were not willing to negotiate too far. Some dealers prefer to display such coins in the hope that a sale may result, others prefer to hold them temporarily off of the market in the hopes of keeping them fresh. While there is some validity to both positions, it certainly is a lot harder to sell a coin that potential buyers don't know you have!

CERTIFIED COIN DEALER newsletter

*a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. IX No. 42 October 21, 1994 Single copy price $4.00

On the Move: Morgans, Peace, Gold, Buffs, Walkers
First Jolt of Electricity in Many Months

The market felt its first 'jolt of electricity' in a good long time with several series showing both advancing Bids and increased Bidding activity. Interestingly several dealers at the Long Beach Show detected "electricity in the air", and the market has proven them correct. Most significantly, much of the good news is coming from the 'core' charts those most important to the market and to collectors. In fact, the good news this week has produced a 0.74 jump in the *CMI*, the largest weekly increase in more than a year! The good news gets better: the second largest increase was two weeks ago, nominating October for "Month of the Year" honors! This week's increases are also broader based — more good news!

It has been some time since we toured the charts, and this seems like an appropriate opportunity. Overall, 95% of all the Bids listed in the *Bluesheet* remain steady; while such stability is good for the market, it doesn't produce very exciting headlines. The *feeling* of the market comes from the mix of advances and declines in the 5% of issues that are changing. This week, 4% of the issues advanced, and it feels like the market is on fire!

Silver Commems remain on the lazy side of indifferent, with discounted selling chipping away at current levels. If and when Mint State Type joins the rally, the Commems will hopefully follow; until then, this looks like a buying opportunity. The Gold Commem *CMI* moved up this week on the strength of scattered advances. Morgan Dollars looked particularly strong this week, with Types advancing between MS63 & MS65. While the 124 advances are impressive, growing Bid support of the stable issues is just as important to market strength. Peace Dollars showed a similar jump, with a combination of Type and scattered advances. Mint State Type can best be described as "steady" (what else can you call such an important chart with less than a dozen changes overall?!). Mint State Gold Type is continuing the pyrotechnics with advances outnumbering declines three-to-one, the Gold advances continue to concentrate on the below 65 grades. The Proof Type *CMI* shows a small decline but here again the real story is one of equilibrium (the drop was caused by only six minus signs — you have to look hard to find them!!). Proof Gold Type had a few increases — just enough to help

Buffalo Nickels. It seemed hard to believe at the time, but a dealer at Long Beach was actually singing 'under his breath' that "Buffalo Nickels are my friend are my friend" It was that kind of Show and Bids have been that kind of series adding another 142 advances to their yearly tally. And the Buff advances are on the rarer earlier dates too, these impressive results are not being produced by small changes in Type Bids. Mercury Dimes remain very quiet, with sporadic increases in selected MS65 Full Band issues over the last several months. The *CMI* for Walking Liberty Halves shows a nice half-point jump, thanks to nearly two-dozen plus signs, many in the early dates. Proof Singles have been sliding most of the year, so any increases are welcome here.

The $20 Saint-Gaudens chart runs only once each month, so you would expect the recent increases in Mint State Gold to show up with a vengeance here — and you won't be disappointed. If more charts looked like the Saints, our headlines would be writing themselves, and it would all be good news.

MORGAN DOLLARS

PCGS and NGC are the two leading third-party grading services. They've graded millions of coins and encapsulated them in sonically sealed holders. Each coin is graded and given a numerical designation from 1 to 70. The higher the number, the better the coin's condition. Coins graded MS-60 or below usually have many nicks and scratches. Coins graded MS-65 or above usually have few, if any, nicks and scratches. Coins graded MS-70 are perfect.

CERTIFIED COIN DEALER newsletter

a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. IX No. 43 | October 28, 1994 | Single copy price $4.00

Selective Enthusiasm Continues Overall Bidding Activity Is Up

The coin market continues to see almost daily improvement in levels of Bidding and enthusiasm. Any doubts about the ability of the market to sustain these levels was set to rest with Stack's auctioning of the James A. Stack Sr. Collection last week, with a total Prices Realized exceeding $6.4 million. The collection was assembled during the 1940s, and the vast majority of the catalogue was uncertified; I sincerely doubt that will be the case one month from now! Actually, with the incredible number of coins realizing more than $20,000, the express lanes are probably clogged already!

Dealers are reacting quickly to the newfound optimism, and many are expressing opinions that almost border on joy! Regardless of current price levels, the moving of inventory (especially with profitable replacement) still remains the key to success. The loudest unhappy voices belong to the "bottom fishers", those dealers who prefer to stock their inventories at the very market bottom. Many of them were unconvinced that these latest advances constituted a real rally (indeed, we aren't totally sure either), and they missed their opportunities in several series for buying at the bottom. As we have seen before, a market can hold steady for months, but once demand develops, the plus signs can pick up quickly. When the market moves fast, it's easy to be too late. Some dealers are still trying to buy at last week's and last month's levels, and meeting little to no success for their efforts.

Bidding levels in the Silver Commemoratives are starting to pick up a little, with several dozen advances; the Gold Commems are also seeing some selective plus signs. Mint State Type still shows no signs of a Rally, while Mint State Gold Type turned in a mixed performance. Proof Type was steady, as was Proof Gold Type. Morgan Dollars are continuing to look strong, with Bid increasing on the generics and on selected rarer dates. There are large orders outstanding for the Morgans, so we can expect this demand to continue to move the market. The bottom for MS65 Morgans was some $15 ago and we are now long past it. Morgans led the movers this week, with 137 advances to 30 declines. Peace Dollars still aren't quite as active as the Morgans, but they are coming along, this week they registered 22 advances to no declines, a ratio we'll take any time!

There was more good news among the specialty series, with Buffalo Nickels accounting for a good percentage of the plus signs in this week's ***Bluesheet***. Mercury Dimes remain very quiet, with just enough discounted sells to put a slightly negative spin on their slumber. Walking Liberty Halves continue to enjoy the benefits of increased Bidding activity and levels, with advances outnumbering declines more than three-to-one. Proof Singles are on the plus side of steady.

Overall, we still need to see more movement on more charts before you will see sheer excitement in our headlines; in the meantime, we are glad to see the enthusiasm from dealers and their clients alike. As one dealer friend put it succinctly at Long Beach, "Get enough clients interested in owning coins, and the market rally will take care of itself."

EXCITING NEWS!!

National Gold Exchange expands staff.

We are pleased to welcome.....

Michael Byers
Mark Chrans
Fred Oliver

Michael Byers

Michael has been active in the coin business for over 17 years. He will attend all major conventions as well as be available to fly to your locations for deals. You can contact him directly at (714)249-2256.

Mark Chrans

Although Mark is known throughout the coin business as buyer of "PQ" quality coins, he will also expand his purchases to include both circ and slab U.S. Gold. You can reach him at (606)266-6172.

Fred Oliver

Fred is well known throughout the coin industry as a buyer of a wide variety of numismatic items as well as the organizer of many popular coin conventions. Fred will be working at our corporate headquarters in Tampa, Florida.

The entire National Gold Staff both in the United States and Europe are excited about the new opportunities this latest expansion will provide. As always, you can reach any member of NGE through our corporate offices in Tampa, Florida at (813)289-0173.

A Special Holder for Your Special Coins

The PCGS Personal Collection Holder

If you own a hundred PCGS graded MS63 St. Gaudens, you probably don't care what the PCGS holder says as long as it says "MS63." But if you have special coins, you may want a holder that indicates something personal about those coins.

Now, with the new PCGS Regency™ Holder, you can choose exactly what you want written on the holder. This new PCGS holder is a premium option for rare coin enthusiasts who want a special way to designate their PCGS coins.

Give a Gift That Keeps On Giving

With the Regency™ Holder, you can give a very special gift to family members, friends, or even to yourself to commemorate special occasions, feelings, or relationships.

Imagine celebrating special events, such as *Weddings, Anniversaries, Birthdays, Graduations or Retirements*, with a gift that adds extra value to those memorable events of your life. Select coins whose dates and values are significant to you and your loved ones. Then, choose a message to make your coins unique.

It's been said that rare coins are "gifts that keeps on giving". Now, with the PCGS customized Regency™ Holder you can give the gift that keeps on giving in the most personal way.

Receive the PCGS Guarantee of Grade and Authenticity

The design of the new PCGS Regency™ Holder has been especially created to emphasize the beauty of the coin without sacrificing the tamper-evident features that make the PCGS Guarantee of Grade and Authenticity possible. With the new PCGS Regency™ Holder you receive the same Guarantee of Grade and Authenticity that applies to all PCGS graded coins.

Customize Your Coins Now and Save 20%

Now, for a limited time and for a special introductory price of $20, you can have your PCGS graded coins personalized with the new PCGS Regency™ Holder and receive a free high quality suede pouch to protect and store each coin. *If your coins have already been graded by PCGS, simply complete the coupon below or call PCGS toll free at 1-800-447-8848 to have your coins placed in the new PCGS Regency™ Holder.* We'll send you all the forms you need to submit your coins directly to PCGS.

If your coins have not been graded by PCGS, either contact a PCGS authorized dealer to have your coins graded or call PCGS for a list of dealers in your area. Tell the PCGS dealer that you want your coins placed in the new PCGS Regency™ Holder. You must have your coins graded by PCGS before they can be placed in the PCGS Regency™ Holder.

Although the normal price for the PCGS Regency™ Holder is $25, you can personalize your PCGS graded coins with the new PCGS Regency™ Holder for only $20 per coin. *But you must act now! This special introductory offer is only good for coins PCGS receives by November 30, 1994.*

For More Information about the PCGS REGENCY™ HOLDER, Fill in the Coupon Below or *Call 1-800-447-8848*

CERTIFIED COIN DEALER newsletter

a weekly report on the Sight-Unseen certified market
published by the Coin Dealer Newsletter (est. 1963)

Vol. IX No. 44 | November 4, 1994 | Single copy price $4.00

Specialty Series Score Rest Trading At Current Levels

Nearly all the action this week came on the *specialty series*, with Buffalo Nickels, Mercury Dimes and Walking Liberty Halves accounting for more than half of all *Bluesheet* plus signs. The Buffs and Walkers come as no great surprise; as the chart indicates, their ***CMI***s have shown strength throughout 1994. The Buffaloes have gained an impressive 94.55 points this year and show every intention of breaking the 100 point barrier by year's end; the Walkers' gain has been a more modest 4.16, but in this slow and steady market, *any* gain is welcome!

The 78 plus signs on this week's Mercury chart come as more of a surprise, but still has dealers thinking mostly that 'it's about time'! While the Mercury Dime ***CMI*** is still down on the year, 1994 has really been a year of steady values weakened ever-so-slightly by the odd discounted sell. The Merc ***CMI*** has remained within a 10 point range for 22 weeks, and within a 20 point range for 38 weeks. This week's 1.26 point climb is the biggest of the year, and dealers will be watching carefully to see if 'Buffalo' thunder can strike here as well.

Some dealers (and collectors) would also consider the Silver Commemoratives to be a specialty series; we tend to agree, and note that they are significant contributors to every market rally. The performance of the Silver Commems during 1994 has been, in a word, disappointing. They started January with a 616.35 ***CMI***, and have slowly slid under the pressure of unrelenting selling to their current 588.18 level; the decline has been without fanfare and without headlines. Still the cumulative drop is approaching 30 points, and that is witness enough to the lack of concerted collector *or dealer* demand. Good news remains that these neat pieces of numismatic history are trading at current levels, especially in the grades below Gem.

Mint State Gold Type, which had been underwriting much of the market on the way down, recently saw some profit taking as dealers adjusted their Bids to meet demand. The high Bidders on Morgan generics were also backing off a trifle, as supply begins to materialize in response to the higher bids, being a few dollars ahead of the pack still provides an amazing incentive to sellers. Peace Dollars, which have remained in the shadow of the Morgans for most of 1994, are beginning to show a little life of their own, with their seventh straight week of a rising ***CMI***.

EXCITING NEWS!!

National Gold Exchange expands staff.

We are pleased to welcome.....

Michael Byers
Mark Chrans
Fred Oliver

Michael Byers

Michael has been active in the coin business for over 17 years. He will attend all major conventions as well as be available to fly to your locations for deals. You can contact him directly at (714)249-2256.

Mark Chrans

Although Mark is known throughout the coin business as buyer of "PQ" quality coins, he will also expand his purchases to include both circ and slab U.S. Gold. You can reach him at (606)266-6172.

Fred Oliver

Fred is well known throughout the coin industry as a buyer of a wide variety of numismatic items as well as the organizer of many popular coin conventions. Fred will be working at our corporate headquarters in Tampa, Florida.

The entire National Gold Staff both in the United States and Europe are excited about the new opportunities this latest expansion will provide. As always, you can reach any member of NGE through our corporate offices in Tampa, Florida at (813)289-0173.

Morgan Dollars & the Market Always Adjusting, Always Interesting

Morgan Dollars are always an intriguing component of the overall market and 1994 has been no exception. The *Blue Sheet CMI* for Morgans has dropped from January's 754.20 to 727.43, a 26.77 decline certainly isn't desirable, but there remains plenty of good news as well. Trading has been quietly active at current levels all year long. Thanks to very strong bidding during October, generics have enjoyed substantial growth: the MS63 Type Morgan climbed from $23 to $25; the MS64 Type from $31 to $41; and the MS65 from an astonishingly low $79 to an equally astonishingly high $96 before settling back to $90! Altogether, a staggering increase in market valuation for the Morgans.

Overall, the sight-unseen *Bluesheet* grades below Gem have shown the greatest strength this year; looking at the sight-seen Bids in the *Greysheet*, we confirmed the same trend ('regular-strike' Morgans below MS65 *averaged* 100% of their January levels, while the MS65s, MS67s and the DMPLs *averaged* only 96%). Surprisingly, slightly more than half of the top 50 percentage gainers since January achieved their impressive gains courtesy of the movements in generics (both true Type and the second tier of 'slightly better' dates). Considering the *averages*, the grades of the leading issues (removing the generic duplications) may be surprising.

A large number of high-powered certified coins will be offered by Auctions by Bowers & Merena at their sale held in connection with the Baltimore Washington Baltimore Convention at the Baltimore Convention Center. B&M's November 17 sale will feature Part One of the Armand Champa's magnificent numismatic Library: this includes items that have not been available for decades, and probably won't be available again until well into the next millennium. On November 18-19, B&M will auction Important Properties from the Massachusetts Historical Society. Collectors interested in certified Gem and rare U.S. coins will find them in abundance.

Gold Commemoratives Trading at Current Levels Are Laggards *the* Buying Opportunity?

Gold Commemoratives, as their ***CMI*** chart indicates, have had a fairly 'tough time' since late-1990. The good news is that they continue to trade, and that they have been trading within a fairly narrow range. Since 1991, their ***CMI*** has adjusted constantly, but within a 100-point range. Gold Commems remain popular, but demand has not been evenly distributed. The starting ***CMI*** in January of 1994 was 626.43 and climbed to 636.96 over the next three months, only to descend to the 618.77 level by mid-year. Since then, the ***CMI*** has continued to slide to its current 575.48 level. Since 1991, the Gold Commems have underperformed the overall ***CMI***, leading some dealers to predict that this series has *enormous* profit potential in the next recovery; this kind of contrarian thinking takes courage, for it calls for buying the issues that have fallen the hardest.

All assumptions about future movements depend upon demand, so it might be worth taking a look at the collector demand that is driving the 1994 market. Advanced collectors have always understood the romantic appeal of certain series. Commemoratives were special, gold was special, and Gold Commemoratives were *very special!* This appeal, while lending itself to marketing strategies, must always be balanced against the market reality imposed by the overall high prices for these rare coins. The set can be completed, to be sure, but it still takes very deep pockets to afford this demand.

As we have seen before, the Gold Commems have turned in very different performances when examined by grade. Since January of 1994, on average, Gold Commem Bids have dropped 8.23% overall; of the 182 Bids found in the Bluesheet, 71 rose or remained the same, and 111 declined. The MS61 and MS62 grades performed the best, while the MS66 and MS67 coins, on average, declined more than 15%. Still making a profit or suffering a loss occurs with the purchase, holding, and sale of individual coins; it's no wonder that dealers are anxious to turn inventory as soon as possible.

The World's Most Important Coins Are Graded by PCGS...Are Yours?

Why are the world's most important coins graded by PCGS?

Because when a discriminating collector goes to the ends of the earth to select the finest known coins for his collection, you can bet he's going to insist on having those coins graded by the most respected and reliable third-party grading service in numismatics — the Professional Coin Grading Service.

But regardless of the size or significance of your collection, we know the importance you place on your coins. We grade each and every coin with equal care — regardless of value or pedigree.

And like the coin pictured here, your personal numismatic masterpieces deserve to benefit from the strict, unwavering grading standard upon which PCGS has built its reputation.

Like the beauty of this coin, PCGS's grading standard has withstood the test of time — and the rigorous demands of the rare coin marketplace — because PCGS's standard remains constant through all market conditions.

PCGS represents professional integrity and grading accuracy to coin buyers and sellers throughout the rare coin community. Time and again, more professional coin dealers, the finest auction houses, the country's most noted collectors, and the coin-buying public depend on PCGS to grade their important coins. The confidence they have shown in our product proves that PCGS is the grading service of choice!

PCGS's grading staff is renowned for its expertise and is comprised of many lifetimes of experience in all facets of numismatics. Assigning the proper grades to our customers' coins has always been our first priority.

And nowhere is PCGS's ongoing commitment to consumer protection and satisfaction more evident than in its cash-backed Guarantee of Grade and Authenticity.

PCGS grades coins from the United States and more than 80 foreign countries. We offer a variety of super-fast turn-around and economy services starting at only $15 per coin. Contact the PCGS customer service department at 1-800-447-8848 for a free list of PCGS authorized dealers nationwide who can assist you in determining which services are right for your coins.

So whether your numismatic masterpiece is worth $50 or $500,000, your coins deserve to be graded by PCGS because every coin we grade is an important coin.

Holiday Season Supports Steady Market Demand Remains Balanced and Specific

As the Holiday Season moves into high gear, retail dealers continue to report steady sales; this, in turn, has produced steady wholesale demand for the most popular gift items. Merchandise is moving at current levels, and dealers seem "satisfied" at this level of activity. "Doing all-right" and "Business is OK" may not be ringing endorsements, but they represent a general sense of rising optimism.

In a steady market with coins trading at current levels, plus and minus signs are limited indicators of market health. It is entirely possible to spend a million dollars without creating a single plus sign (simply by buying at Bid), and it is equally possible to sell a million dollars of inventory without creating a minus sign (by avoiding discounting any coins). All caveats being equal, however, it's still better to have more plus signs than minus signs, and that is what the market has been producing: over the last ten weeks, the *Bluesheet* has reported a total of 2,866 advances against only 1,489 declines. During that time the overall ***CMI*** has moved up a diminutive 0.90 points (from 689.01 to 689.91), but at least we're headed in the right direction!

Buffalo Nickels continue as the most exciting chart, with another solid advance. Over the last ten weeks, the Buffalo ***CMI*** has climbed from 816.28 to 861.95, a rock solid 45.67 points. Now, no one is arguing that the Buffalo Nickel market is as important as Mint State Gold Type or Morgan Dollars (except to the Buffalo specialists!), but there is a lesson to be learned when a handful of specialists channel demand: In any series, retail enthusiasm can result from wholesale enthusiasm. In a supply-demand setting, the market will 'correct' any dealer whose prices outdistance demand, but it is equally true that demand can be encouraged. There is probably a good reason that Ford, GM and Chrysler have enormous advertising budgets.

Other charts have also enjoyed positive movements in their *CMI*s over this ten-week period. The Morgan Dollar *CMI* has crept from 727.59 to 727.75; this week, Morgan plus signs outnumbered declines nearly three-to-one. The Peace Dollar *CMI* has climbed from 535.51 to 541.76, a solid advance from a series that has long been in the shadow of the Morgans. Mint State Gold Type has been as erratic as ever, but still managed an overall movement from 569.09 to 573.36; dealers waiting for a steady climb from Gold must wait a while longer! Proof Gold Type, noted for being steady, advanced slightly from 696.93 to 698.41. The Walking Liberty Halves' *CMI* moved from 750.30 to 752.33 on sporadic demand. Among the supplemental charts, the Saint-Gaudens turned in the best ten week performance, rising from 842.86 to 847.18; the Saints remain one of the strongest charts in the marketplace.

The charts whose ***CMI***s have declined slightly over the same ten weeks tell a pretty familiar story. Demand has been steady, and coins have been trading *mostly* at current levels, but there have been *just enough* discounted sells to put a slightly negative spin on their market. Dealers anxious to move merchandise are willing to cut their profits to do so, and if they have no intention of replacing that inventory, a sale slightly below Bid may be logical. Such sales would be hidden by a rising market, but in a steady one, any negative news, however slight, is visible.

MARKET LISTINGS

MARKET [illegible] of the latest dealer-to-dealer asking prices paid or bid for [illegible] based on numerous [illegible] and other sources of current information. Actual prices realized on these issues may vary considerably from the values shown, depending upon the [illegible] of the moment. Use these prices as a guide only. Prices in the "Market" column are generally more conservative than those in the "Bid" column. Values for coins in problem grades may be greatly affected by local supply and demand. Coins certified by a grading service may command premiums above the prices listed. Due to the relative scarcity of certain issues, prices may be greater or less than the Market value listed. Values for coins in grades not listed may be interpolated from prices listed for adjacent grades. Coins certified by a grading service may command premiums above the prices listed. Due to the relative scarcity of certain issues, prices may be greater or less than the Market value listed. Values for coins in grades not listed may be interpolated from prices listed for adjacent grades.

Plus Signs Slowly Spreading Across Charts
No Dramatic Headlines; Just Good News

The return of plus signs to the *Bluesheet* charts continues as dealer optimism continues to grow. A dealer friend recently challenged us on whether plus signs created dealer optimism, or if dealer optimism created plus signs. The best answer, of course, is "**Yes.**" There are times when this seems like a chicken & egg question, but we lean towards the perspective that since all plus signs must come from dealers, it really is *demand* that fuels the cycle of plus signs and optimism. At this point in any philosophical discussion about prices, I feel the need to point out that many dealers feel that the coin market has a life of its own, quite aside from dealers' or collectors' wishes (and even sometimes apart from their actions!). It's too late in the year to think about weighty subjects like that — maybe next year.

Far better to just enjoy the reality of a coin market showing some very healthy signs of life. That is the best Holiday gift any dealer could ask for! Stated succinctly, "Demand is up." Specific demand (that is, demand for very specific items) is up, with plus signs spreading across the charts — not enough to get ecstatic about, but very definitely good news. General demand is up, with more dealers placing more Bids on more coins near current high levels. This general strengthening of the market, even though it doesn't necessarily produce any plus signs, is critical to any future market rally. Trading activity is up — not as much as many would prefer, but the increased demand has dealers working at creating the right blend of coins in inventory. Overall, it seems that the greatest support continues for the coins graded below Gem; demand for the MS65-and-up coins is simply not as widespread as for the more collector-oriented grades. Even steady demand spread across a constantly growing population of Gem certified coins is bound to result in depressing price levels that must always be the end result of increased supply against steady demand. Hopefully, the lower prices will induce buyers to consider higher grades. As the spreads narrow, this can become an important selling point.

Silver Commemoratives are actually showing more advances than declines this week! We try never to make predictions, but we keep waiting for Commem demand to explode: great coins at reasonable prices deserve more demand. Gold Commems were also slightly on the plus side of steady. Morgans were steady except for a solid drop on MS64 generic. Peace Dollars showed a few generic minuses as well. Mint State Type and Proof Type coins both turned in a steady performance. Someday, someday, but until then, follow the lead of dealers who are cherry picking the very best of Type at current levels. Mint State Gold Type showed a large number of adjustments, some minor, and some more substantial; the Gold market continues to seek an elusive equilibrium.

Among the specialty series, Buffalo Nickels turned in a quiet week, with only 44 plus signs against two declines — gosh, every week can't be a boomer. Mercury Dimes came in on the plus side of steady, as did Walking Liberty Halves. Proof Singles continue to show little adjustments with little net effect. The market, for far too long, has been *just* on the minus side of steady; now, it's *just* on the plus side of steady. No dramatic headlines, just quiet good news. The kind of good news that produces dealer optimism and additional plus signs!

Mint-Marked Gold Stars At Stack's Mint State Gold Type Retreats With Spot

The growing demand behind recent market advances has taken a breather this week with most of the charts showing just a few changes (with most regrettably on the minus side). The weakness in Gold generated by declines in Gold Spot forcing down many of the Types didn't seem to affect Bidding at Stack's $2.7 million sale of United States Coins concluded last Thursday. The four estates comprising the sale contained a marvelous selection of U.S. Gold including high quality and rare date issues. Especially strong were the selections of earlier mint-marked coinage. A specialty collection of Charlotte Gold containing all the collectable issues attracted the attention due high-grade rarities that had been off the market for several decades; while none of these coins were certified before the sale, that situation has already begun to be remedied! (see inset for highlights).

Discounted sells on Silver Commemoratives have produced a few dozen small declines, just when the market was starting to look up. Gold Commems remained mostly steady. Morgan Dollars are enjoying some of the most active Bidding in years, but this week, at slightly lower levels this results in few plus signs. Any dealer discounting into these lowered levels will produce a minus sign unfortunately. Peace Dollars, which had been strengthening, also showed some signs of profit-taking.

Mint State Type Bids were 99% steady, but here again can be found a smattering of declines. On the other hand, you don't have to look hard at Mint State Gold to find the minus signs. Following declines in Spot, Mint State Gold Type has been hit hard; some of the declines are small in scale, while some reflect a greater drop in demand. Mint State Gold Type prices have remained extremely volatile during 1994, and their movement could not always be blamed on spot variations (as you would expect). During the last three months, Mint State Gold has changed direction four times. This volatility, this inability to sustain a rally, this inability to even remain stable has negatively impacted the rest of the rare coin market. There will be many dealers who insist that changes in bullion prices should not affect the market for *rare* coins; we agree totally and only wish that it was the true reality. Proof Type and Proof Gold Type were both just on the minus side of steady.

Balancing the market some rising prices in the specialty series are continuing to reflect growing demand. The Buffalo Nickels turned in a few dozen advances. Mercury Dimes plus signs outnumbered declines three to one and Walking Liberty Halves advanced as well.

THE $5,000,000,000 CUSTOMER SATISFACTION TESTIMONIAL

The Grading Service of Choice

More collectors, investors *and professional coin dealers* choose PCGS than any other third-party service for the accurate grading of their valuable coins. In fact, PCGS has now graded 3,726,801 rare United States and world coins with a cumulative declared insurance value of $5,000,000,000. That's nearly twice the total coins graded by all of our competition combined!

Our track record is a potent testimonial to the benefits we provide to consumers. But numbers alone don't tell the whole story. There are many excellent reasons why PCGS has earned a reputation as the grading service of choice for the rare coin industry.

The PCGS Advantage

Eight years ago, PCGS became the first third-party grading service of its kind. The company's founders coupled the concept with the comprehensive, cash-back PCGS Guarantee of Grade & Authenticity. Then they added coin encapsulation as the best method of reinforcing the guarantee in the marketplace for the life of any PCGS-graded coin.

Today, these creative innovations remain unsurpassed in offering consumers the most reliable form of protection for their coins.

The Highest Standards for Your Coins

Having your coins graded by PCGS has benefits that go well beyond the fundamental advantages of grading objectivity and coin encapsulation.

Because PCGS upholds the highest quality standards in the industry, our clients are assured of grading accuracy and consistency that they can bank on, coin after coin and year after year.

Some people like to say our grading standards are a little strict. But that's a reputation we can live with because when you buy a PCGS-graded coin you can be confident that you're buying a problem-free coin, which has been graded using the most widely accepted grading standards in numismatics.

The PCGS Authorized Dealer Network

PCGS is supported by a network of more than 792 reputable authorized dealers throughout the United States and Canada. They are ready to assist you with PCGS submissions and your other numismatic needs. Your local PCGS dealer can help you screen your coins to determine which coins are right for grading and which PCGS service to use. He will also help you assign a value to your coins for insurance purposes and package them according to PCGS safety guidelines.

Imitation is the Sincerest Form of Flattery

From the beginning, PCGS found immediate success in achieving a level playing field where consumers could participate in the coin market with new confidence. Other grading services soon began patterning themselves after the PCGS concept. But none can offer the overall value inherent in the PCGS product.

We at PCGS believe that not all MS65's are created equal. PCGS invites you to take the PCGS Challenge. Compare the fair market value between a PCGS-graded coin and a like coin in the same condition graded by different services, and see for yourself.

Now is an Excellent Time to Have Your Coins Graded by PCGS

We currently offer a variety of affordably-priced services designed to fit into the structure of today's lower coin market levels. And now is the time to get some of the most favorable turn-around times available through PCGS in recent years.

If you own coins, you owe it to yourself to have them graded by PCGS. Please contact our customer service department at 1-800-447-8848 for a brochure outlining the advantages of third-party grading, a complete list of PCGS authorized dealers and our list of services.

The MS66 $10 Eagle shown above was submitted by Spectrum Numismatics International. This is the coin which brought the total declared insurance value of all coins submitted to PCGS to more than $5,000,000,000.

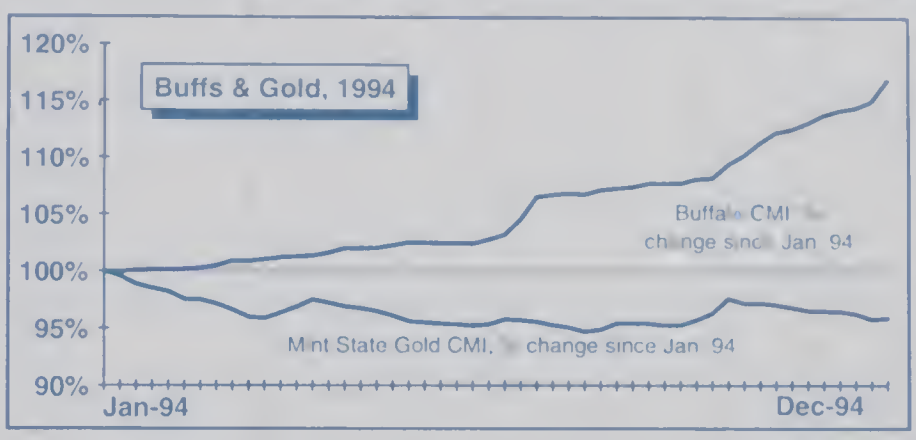
Buffs Hot, Gold Not
Rare Dates Fuel Gold Demand

The overall market continues quiet and steady, but within that calm there is plenty going on in a few of the charts. We have been writing about Buffalo Nickels all year long, as all year long they provided the only *steady* source of plus signs (and "good news" headlines!). Nothing like finishing the year with a bang, as they have logged in an astonishing 173 plus signs in this week's *Bluesheet*! And that is an astonishing week even by Buffalo standards! It also happens to account for 70% of the good news in this week's newsletter.



Mint State Gold Type, on the other hand, has been acting like, well, Mint State Gold Type. Another 43 declines set off against the solitary rise of the High Relief in MS62. I know I've said this before, but only a dozen times or so: there can be no *sustained* market rally without Gold, and Gold shows no *sustained* signs of interest in rising. It's tried, to be sure, and on several occasions; but each time the market retreated once the immediate demand was filled. Without underlying strength in Gold, dealers have neither the incentive nor the cash flow to expand their inventories in rare coins. There are simply too many dollars tied up in too many Gold coins in too many coin shops across America for the market to behave any differently; dealers need to make money on their Gold inventory.

Certainly we can blame some of Gold's lethargy on the underlying decline in Spot, but this volatility in Spot makes even less sense than usual! Accepted wisdom attributes the drop in Gold Spot to the "more fiscally responsible" Republicans gaining control of Congress. Now we normally prefer to stick to the topic of coin prices and leave politics alone, but you will hopefully permit me one brief comment. I will [illegible] the very best of luck in balancing the budget sooner, but do *you* have enough faith in their ability to justify a 2% drop in Gold? Should the proposed increases in military spending and decreases in taxes occur, Congress will need to find some $350 billion in "entitlement" cuts. Coins **should** be soaring. Oh well, at least the coin community is doing their share to balance the budget by buying new Commemorative issues.

There is some irony in rare-date mintmarked Gold coins being one of the brighter segments of the market; Spot volatility doesn't seem to be affecting the demand for these low mintage beauties! The following prices on early Liberty Gold were noted at Heritage's St. Louis Bullet Sale:

CERTIFIED COIN DEALER newsletter

a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. IX No. 51 December 23, 1994 Single copy price $4.00

F.U.N. In the Sun & On the Bourse
Last *Bluesheet* for 1994

The Florida United Numismatists (F.U.N.) Show has become as traditional as numismatics gets. Over the years, F.U.N. has grown to the point where thousands of dealers can't imagine starting their year anywhere else. For the last several years, late December has been slow, and with many of the 'bigger spenders' out of the market, discounted selling seems to be even more noticeable. But dealers know that the dealer demand returns with the New Year, and they express that optimism — and it starts with F.U.N. With such a large bourse, and accompanied by a major auction, the Show provides dealers with every opportunity they need to get their inventories supplied and balanced. For collectors, of course, such large Shows provide the opportunity to blow the whole year's budget on irresistible items — several times over, usually.

The 1995 F.U.N. auction will be hosted by Bowers & Merena and The Commodore Matthew C. Perry Collection contains their 'usual' vast array of numismatica (the Perry coins are not to be missed!). Naturally, there will be ample lots of high-quality certified material from which to choose, and collectors of high-grade Early Coppers and Gold will be frenzied. Highlights include: (see inset at right)

The staff of the *Coin Dealer Newsletter family of publications* wishes the happiest of Holidays and a prosperous New Year to all of our readers. This will be our last issue for 1994; your next *Bluesheet* will be dated January 6, 1995.

WALKING LIBERTY HALVES

CCDN uses the Expert Bid and Market Value to provide a consensus opinion of coin values. Expert Bid is the highest price that a knowledgeable dealer is willing to pay for a coin. Market Value is the price that a knowledgeable dealer is willing to accept for a coin. Higher bids for many coins may be found in dealer advertisements in this publication.
